

HP Envy x360 m6-aq103dx RAM Replacement

How to replace the RAM in the HP Envy x360 m6-aq103dx.

Written By: Joey Chen

INTRODUCTION

This is a guide to replace the RAM in the laptop. You will only need the anti-static wristband for this guide.

TOOLS:

- [Spudger](#) (1)
 - [Phillips #1 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
 - [T5 Torx Screwdriver](#) (1)
-

Step 1 — Bottom Cover

- Flip the laptop over to expose the underside.
 - Remove the two grip pads with blue plastic opening tool by inserting the tool between the laptop and the pads and slowly lifting up.
-  The grip pads are tacky, remove slowly to avoid separating the adhesive.

Step 2

- Remove the two 8 mm Phillips Head screws that were under the grip pads using a Phillip's Head 1 Screwdriver.

Step 3

- Remove the six 5 mm Torx screws using a T5 Torx Screwdriver.

Step 4

- Use the nylon spudger to pop off the bottom cover by inserting it into the heat vent and twisting to the left or right.

 You may hear a slight clicking or popping, but that is normal.

Step 5 — Battery

- Use the Phillips Head 1 Screwdriver to remove the six 4 mm screws.

Step 6

- Disconnect the battery port from the motherboard by gently lifting it on both sides with the plastic opening tool.
- Lift up the port with the tool.

Step 7

- Lift the battery out of the laptop with your hands.

Step 8 — RAM

- ⓘ Make sure you are wearing an anti-static wrist strap.
- Remove the ram's metal cover with your hand.

Step 9

- Pull the two outer pins on either side of the ram chip outward with your hands.

i The ram chips should pop up.

- Do this for both chips.

Step 10

- Remove the chips one at a time, by sliding them towards the side of the computer they are pointing towards.

To reassemble your device, follow these instructions in reverse order.
