

HP G62-340US Hard Drive Replacement

A brief guide on how to remove the hard drive from an HP G62-340.

Written By: Yun Yang

INTRODUCTION

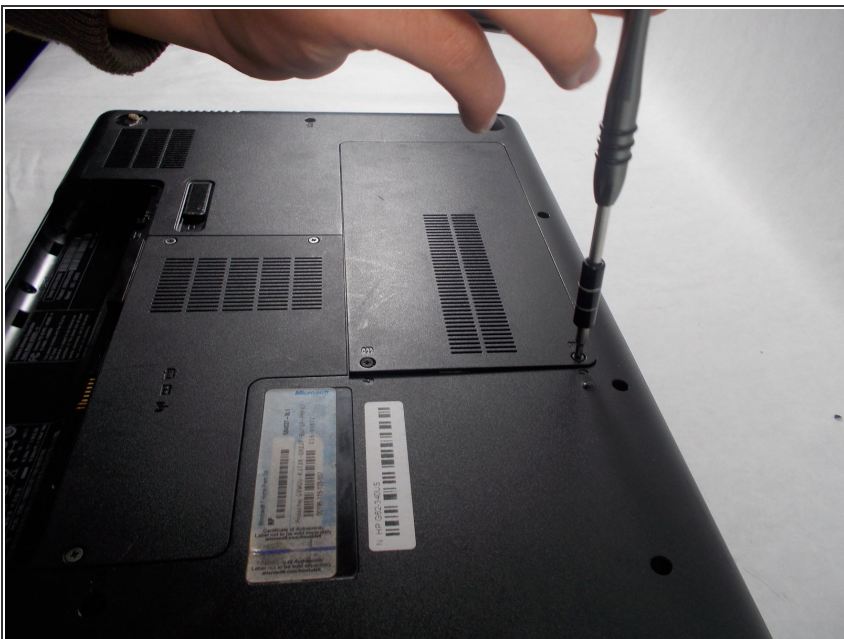

A brief guide on how to remove the hard drive from an HP G62-340.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Hard Drive

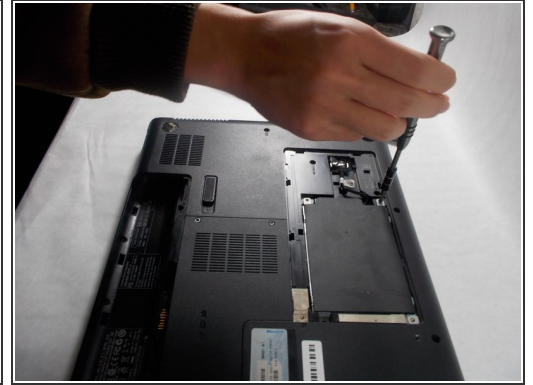

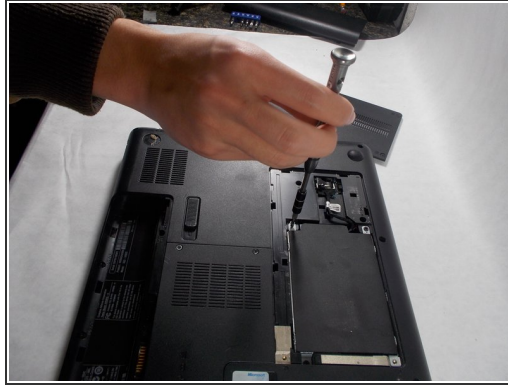

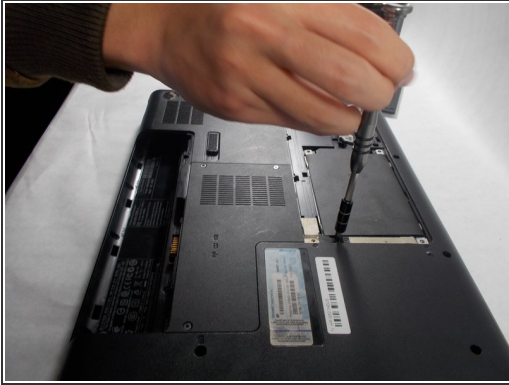

- Turn off the computer and disconnect the charging cable from the computer.
- Turn your laptop over and locate the hard drive module compartment.

Step 2

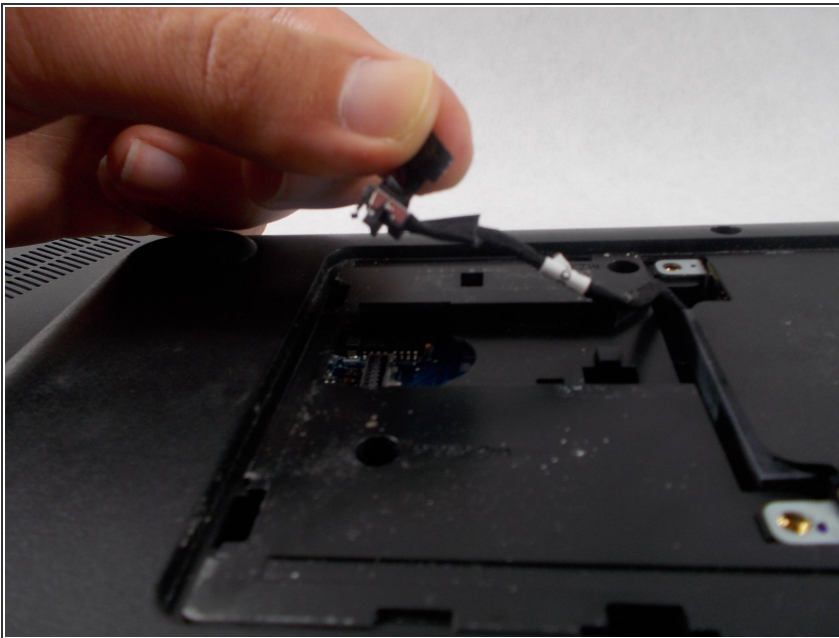

- Use a screwdriver to loosen the two Phillips PM2.5x6.0 captive screws on the hard drive cover.
- Lift the left side of the hard drive cover and remove the cover.

Step 3

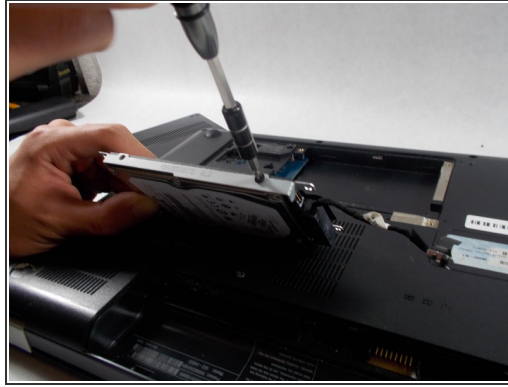

- Use a screwdriver to remove the three Phillips PM3.0x4.0 screws on the hard drive.

Step 4

- Disconnect the hard drive cable from the system board and gently remove the hard drive.

Step 5

- Remove the 4 screws from the hard drive bracket and separate it from the hard drive.

To reassemble your device, follow these instructions in reverse order.
