Step 1 — Battery

- With the case closed, place the Mini 1000 top-side down on a flat surface.

- Push both of the battery release latches toward each other.

Step 2

- Lift the battery out of the Mini 1000 from the edge closest to the release latches.

Step 3 — RAM

- Before proceeding, slide the right battery release latch to the unlocked position nearest the center of the computer.

- Use the tip of a spudger to slide the RAM compartment cover release latch away from the center of the computer.

- ⓘ At this point, the edge of the RAM compartment cover nearest the battery compartment should pop up from the lower case.

Step 4

- Remove the RAM compartment cover from the lower case.

Step 5

- Use your fingers to simultaneously pull both RAM retaining arms away from the center of the RAM chip.

- ⓘ The RAM chip should pop up slightly from its socket.

- Pull the RAM chip out of its socket and remove it from the Mini 1000.
