INTRODUCTION

The Wi-Fi Card is also called a WLAN Module, and is what connects you to the internet without needing to be attached to a cord.

🔧 **TOOLS:**

- Phillips #00 Screwdriver (1)

Step 1 — Battery and Service Access Cover

(i) Before beginning, make sure that your computer is turned off and all external power cords are disconnected.

● Close the laptop and turn it over, so that the underside is up and the silver battery bay is facing towards you.

Step 2

● Locate the battery locking latch on the bottom right corner and slide it inward to unlock the battery.

● Locate the battery release latch on the bottom left and slide it inward.

● Pull the battery towards you to remove it from the laptop.

Step 3
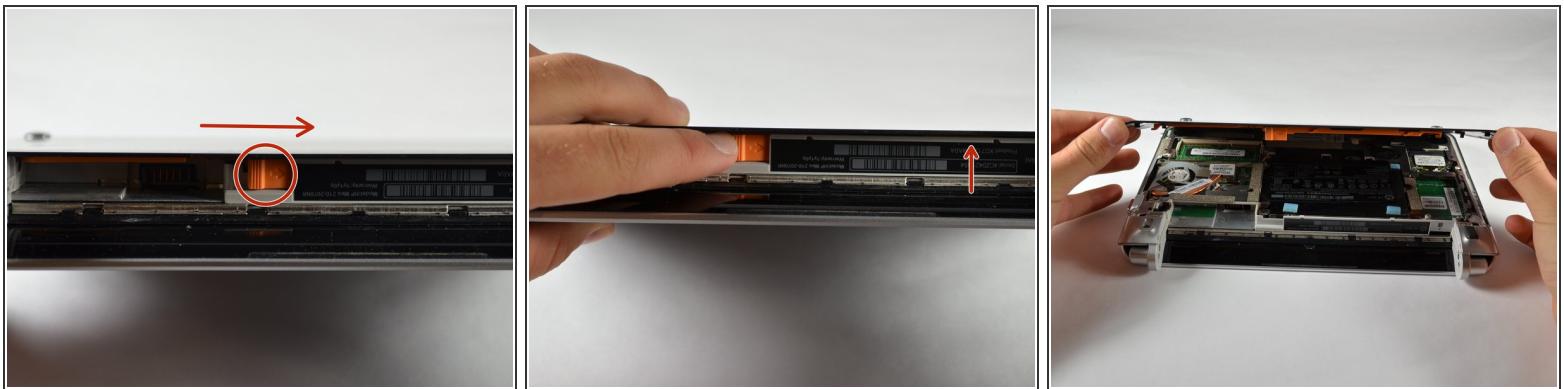

- Locate the service access cover release lever and slide it to the right.

- While holding the lever to the right, lift up the laptop's bottom cover gently and remove the cover from the laptop.

Step 4

- If you are performing any installations after the battery, orient the computer so that the underside is up, and the battery port is facing away from you.

Step 5 — Wi-Fi Card (WLAN Module)
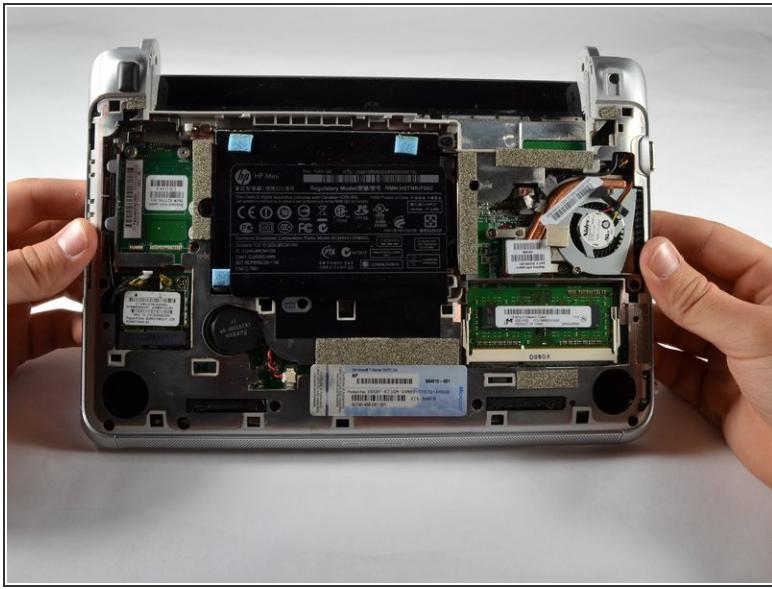

- Locate the Wi-Fi Card (WLAN Module), near the computer's bottom left corner.

Step 6

- Disconnect the two cables from the Wi-Fi card by gently lifting them away from the card.

- ⓘ There should be two black cables, one labeled with a white sticker, connected to the module.

Step 7

- Using a 00 Phillips screwdriver, unscrew and remove the two 2.0 x 3.0 Phillips screws securing the Wi-Fi card.

- ⓘ The card should tilt up away from the laptop at an angle after removing the screws.

Step 8

- Remove the Wi-Fi card by gently pulling it out of it's slot at an angle.

- ⚠ Be sure to pull gently and at an angle away from you. If the card is pulled straight up, there is a chance it could break or bend.

To reassemble your device, follow these instructions in reverse order.
