Step 1 — Before dissembly

- Before disassembling the computer, follow these steps:
  - Shut down the computer
    - 📌 If you are unsure whether the computer is in hibernation, turn the computer on, and then shut it down through the operating system.
  - Disconnect all external devices connected to the computer
  - Disconnect the power from the computer by first unplugging the power cord from the AC outlet and then unplugging the AC adapter from the computer

Step 2 — Removing the battery

- To remove the battery:
  - Position the computer upside down on a flat surface
  - Slide the battery lock latch (1)
  - Slide the battery release latch (2)
  - Remove the battery (3) from the computer

Step 3 — Optical Drive

- To remove the optical drive:
  - Remove the Philips PM2.5x6.0 screw (1)
  - Remove the optical drive (2) by sliding it out of the optical drive bay

---

To reassemble your device, follow these instructions in reverse order.
