INTRODUCTION

Sometimes the battery for the motherboard on the HP Officejet Pro 8600 Plus goes bad. This guide describes how to replace the battery located on the motherboard.

🔧 TOOLS:

- iFixit Opening Tools (2)
- T10 Torx Screwdriver (1)

Step 1 — Motherboard

- Turn the printer so the back is facing you.

- Put the printer in a vertical position by lifting its right side.

Step 2

- Remove the two 12mm T10 Torx screws on the top edge of the printer.

Step 3

- Rotate the printer clockwise so the bottom of the printer is facing you.
Step 4

- Insert the plastic opening tool underneath the slot on the right that aligns with the edge of the back panel.

- Insert a second plastic opening tool in the notch lining up with the crease in the back panel.

- ⓘ This step requires applying a significant amount of force on the left notch. Don't be alarmed if you hear popping noises.

Step 5

- Remove the side panel from the printer by lifting upwards toward you.

- For reassembly, slide the side panel from left to right into place.

Step 6

- Remove the four 6.5 mm T10 Torx screws from the motherboard.

Step 9 — Battery

- Turn the motherboard over so the back is facing upward.

- Use the plastic opening tool to pry the battery out of place.

Step 10

- Remove the battery by grabbing its edges, lifting upward, and sliding sideways.

To reassemble your device, follow these instructions in reverse order.
