

# HP Omen 15-ax280nd Hard Drive Replacement

Replace the internal SATA hard drive with a new one.

Written By: Cas Eliëns

## INTRODUCTION

Use this guide to replace the internal 2.5" SATA hard drive in your HP Omen laptop with another one.

### **TOOLS:**

- [Phillips #0 Screwdriver \(1\)](#)
- [iFixit Opening Picks set of 6 \(1\)](#)

### **PARTS:**

- [1 TB SSD \(1\)](#)

## Step 1 — Turn off your laptop

- Disconnect all cables from your laptop

## Step 2 — Unscrew the back cover

- Remove 10 screws from the back cover
  - 2 large Philips #0 screws
  - 8 smaller Philips #0 screws

## Step 3 — Remove back cover

 The laptop scratches easily, be careful when removing the back cover.

- Turn the laptop over and open the lid
- Remove the back cover
  - Place an opening pick in between the back cover and main body of the laptop
  - Work your way around the body, snapping open the clips holding the cover in place from the inside
- Turn the laptop over again and remove the back cover

## Step 4 — Remove hard drive

- The hard drive is located in the back right of the laptop
- A cable runs over the left drive bar, make sure to move it out of the way before removing the drive.
- Pull the back of the drive up and backwards to remove it from the laptop.
- ☒ Make sure to disconnect the SATA power and data cables before fully removing the drive.
- The drive bars can be removed without any tools, simply pull them to the side.

To reassemble your device, follow these instructions in reverse order.
