INTRODUCTION

Replace the hard drive on your HP Pavilion 13-p110nr to make your device faster and run better. This guide provides a detail explanation of how to replace your hard drive. Before you begin, make sure you have adequately troubleshooted your hard drive using this [Troubleshooting Page](#). In addition, make sure you have read through all the steps required and understand what you will be doing. Notice that in our guide our pictures do no show the actual hard drive, so keep that in mind while working through the steps. If you don't understand or feel comfortable completing any of the steps, find someone with more experience to assist you with this guide.

TOOLS:

- Spudger (1)

PARTS:

- HP Pavilion 13-P110NR Hard Drive (1)

Step 1 — Hard Drive

- Use the black nylon spudger to carefully remove the back of the laptop from the screen.

Step 2

- Carefully pull up on the hard drive which will allow it to come out with ease.

(i) The device pictured is lacking a hard drive, so a prop was used.

To reassemble your device, follow these instructions in reverse order.
