Step 3

- Remove the two plastic tabs with a metal spudger.

Step 4

- Remove the sixteen 8mm screws that hold the bottom cover with a Phillips #1 screwdriver.

Step 5

- Pull the Optical Drive out.

Step 6

- Remove the 3mm screws that were hidden under the Optical Drive with a Phillips #00 screwdriver.

Step 7

- Flip the computer back over.

- Use a plastic opening tool to release the clips holding the keyboard section in place.
Step 8

- Close the lid and pull the screen and keyboard section up and away from the disconnected bottom cover.
- ⚠️ The hard drive is NOT screwed into place on the underside of the keyboard section.
