INTRODUCTION

By following this guide, you will be able to replace the CD Drive. The drive is probably the easiest part to replace on the laptop.

🔧 TOOLS:

- Phillips #0 Screwdriver (1)
- iFixit Opening Tools (1)

Step 1 — Battery

📌 Make sure the laptop is off and unplugged before starting.

● Using the plastic opening tool, remove the top rubber feet on the back panel as it hides one of the screws we will be removing.
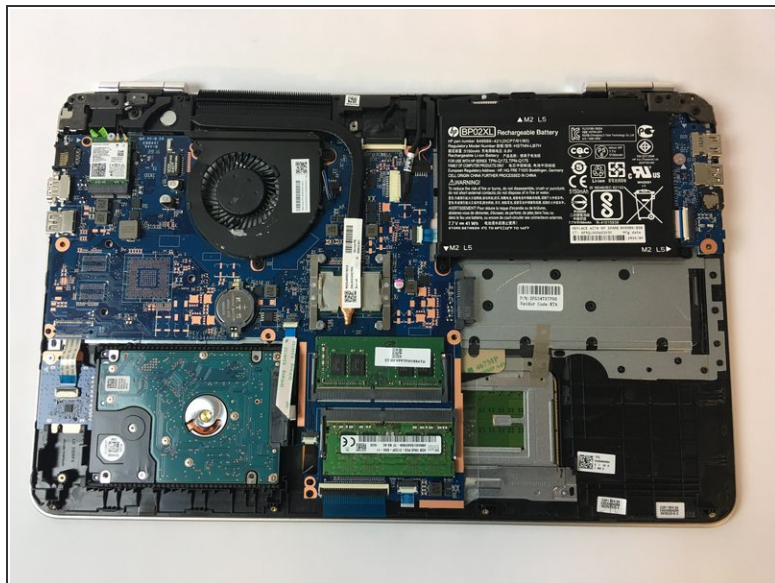

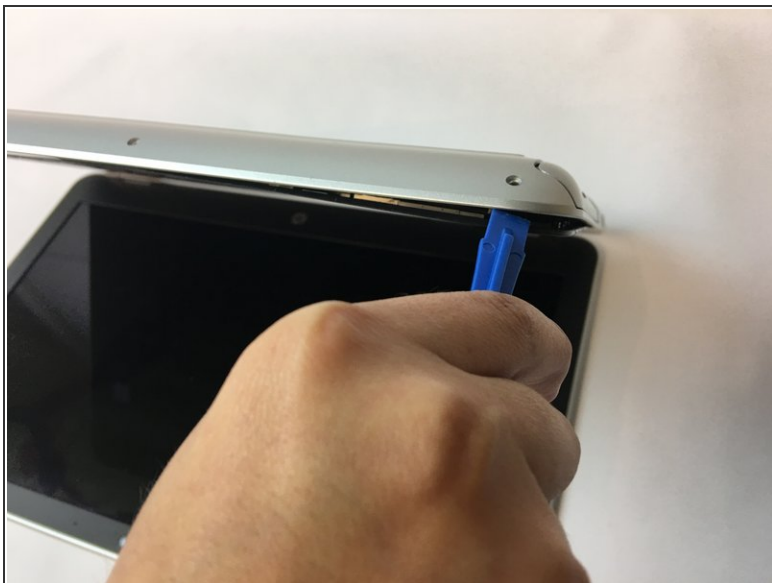

Step 2

● Using a PH0 screwdriver, unscrew the ten 4.4mm Phillips head screws located on the back panel.

|

Step 3

- Using the plastic opening tool, remove the back cover of the laptop.

- ⓘ It is recommended that you start with a corner and run the tool throughout the edges of the cover.

- ⚠ Be sure not to bend the cover by applying too much force.

Step 4

- Using a PH0 screwdriver, unscrew the two 3.8mm PH0 Phillips head screws that hold the battery in place.

Step 5

- Carefully disconnect the cable connecting the top of the battery and remove the battery.

Step 6 — CD Drive

- The CD Drive is located at the bottom right area of the motherboard.

Step 7

- Disconnect the CD drive from the motherboard connector on the left.

To reassemble your device, follow these instructions in reverse order.
