

HP Pavilion 15-b109wm Battery Replacement

How to replace a HP Pavilion 15-b109wm battery.

Written By: David Atunlute

INTRODUCTION

If troubleshooting steps have been followed and it is obvious that the problem with the device might be originating from a faulty battery, then follow these steps to replace your device battery. Before starting to poke into the device, ensure to take safety precautions to avoid battery fluid getting on skin or any valuables. This replacement would take about 5 minutes. So, take your time and follow the steps thoroughly and this will be a success.

Step 1 — Battery

- Power off the device and disconnect from any power source.

Step 2

- Turn the device upside down and ensure the back of the device is facing you.

Step 3

- Push both buttons towards one another simultaneously. The battery slightly pops out.

Step 4

- ⚠ Pull out the battery from the device's battery slot.

To reassemble your device, follow these instructions in reverse order.
