## INTRODUCTION

This replacement guide will show how to replace the keyboard of an HP Pavilion 15-b109wm. This process will take between 10-20 minutes, if done correctly. Remember to take your time and do the steps correctly and gently to avoid parts breakage.

### TOOLS:

- [Heavy-Duty Spudger](#) (1)
- [iFixit Opening Tools](#) (1)
- [JIS #1](#) (1)

## Step 1 — Battery

- Power off the device and disconnect from any power source.

## Step 2

- Turn the device upside down and ensure the back of the device is facing you.

## Step 3

- Push both buttons towards one another simultaneously. The battery slightly pops out.

## Step 4

- ⚠ Pull out the battery from the device's battery slot.

## Step 5 — Keyboard

- Use JIS #1 screwdriver to remove the eleven 6 mm screws.

## Step 6

- Locate the two screw holes that allow access to removing the keyboard.
- *i* There is a keyboard sign beside both keyboard access holes.

## Step 7

- Turn the device onto its side.
- Using a heavy duty spudger, gently disengage the keyboard.

## Step 8

- Using a plastic opening tool, release the keyboard clips.

## Step 9

- Tilt the keyboard to expose the *Zero Insertion Force* connector to which the keyboard cable is attached.

## Step 10

- Disconnect the keyboard cable from the motherboard by detaching the *Zero Insertion Force* connector.
- (i)** To detach the connector, release by lifting the black plastic tab up.

To reassemble your device, follow these instructions in reverse order.
