

HP Pavilion 17-g192dx Screen Replacement

How to replace the screen in a HP Pavilion 17-g192dx.

Written By: Dominic Perito

INTRODUCTION

This Guide covers how to replace the 17.3 in display on the Hp Pavilion. Only replace if it is beyond repair and required.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [Phillips #00 Screwdriver](#) (1)
 - [Metal Spudger](#) (1)
-

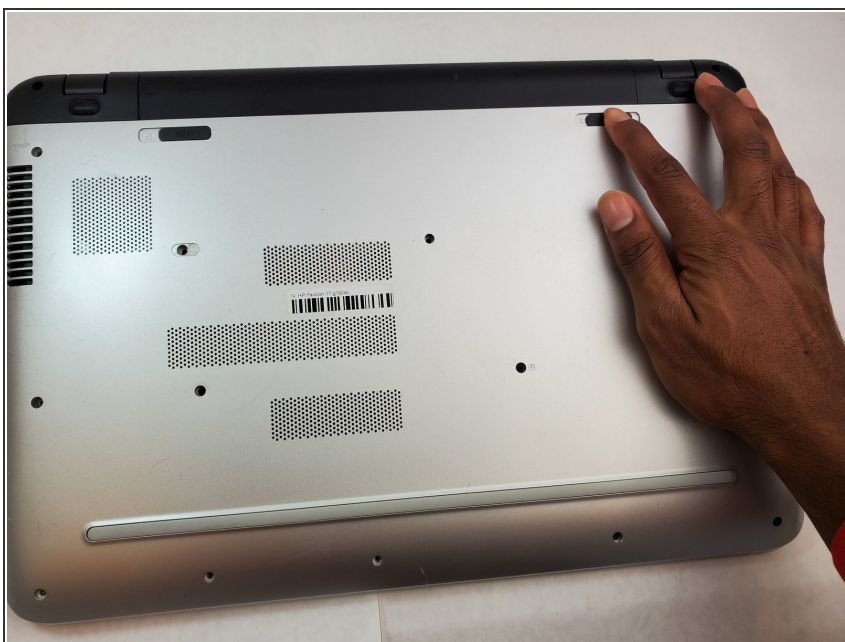

Step 1 — Battery

⚠ Turn off the laptop.

- Slide the battery lock to the right until you see the open lock symbol.

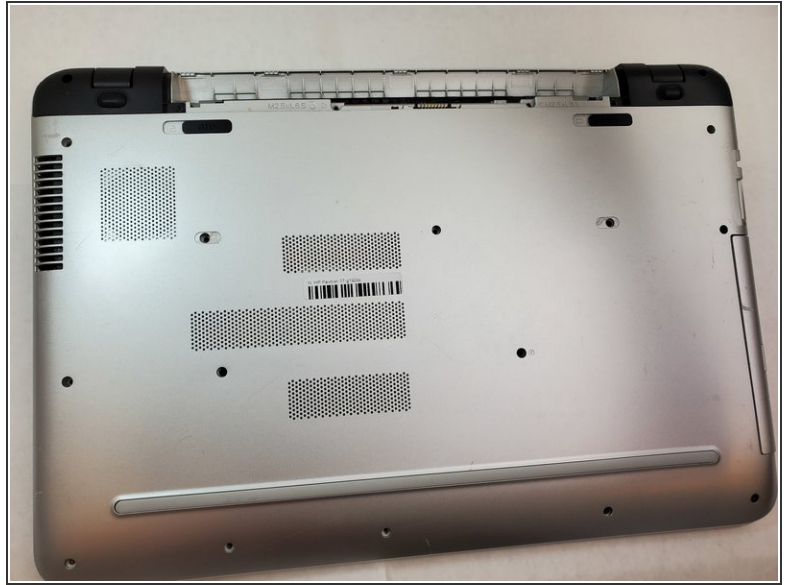

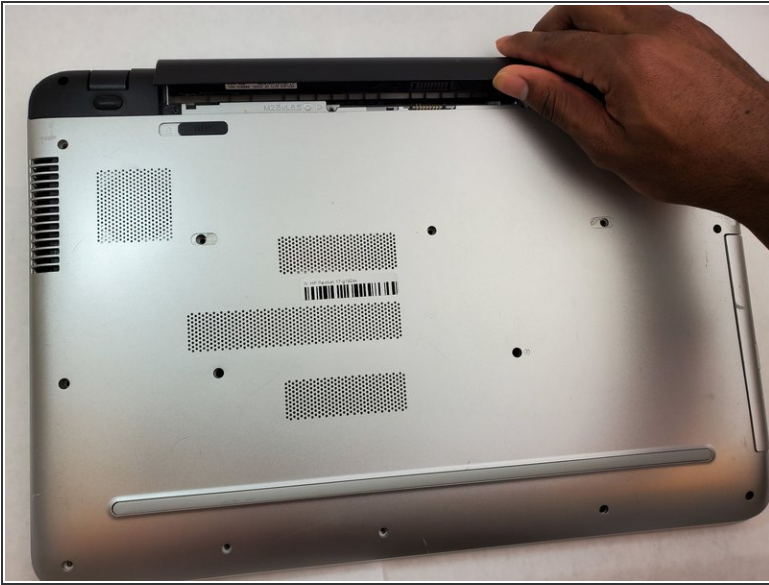

Step 2

- Slide the battery release to the left until the battery pops up.

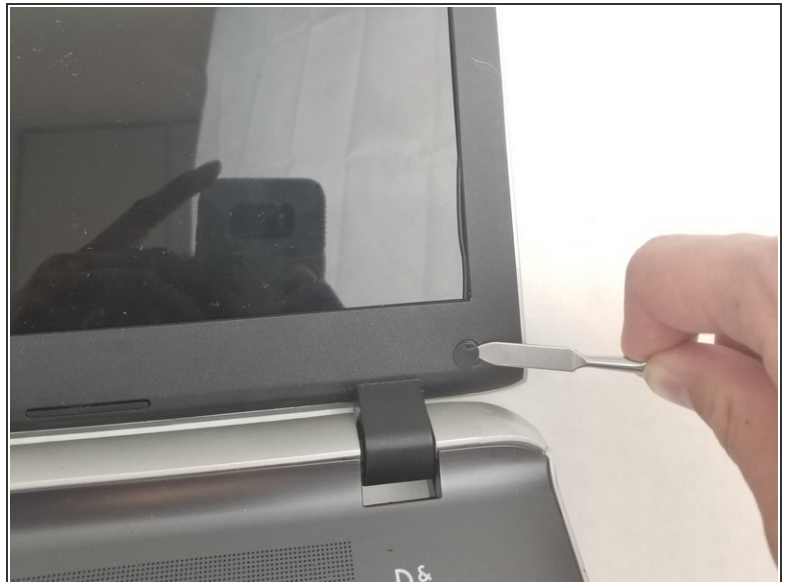

ⓘ This may require significant force.

Step 3

- Lift the battery up.

Step 4 — Screen

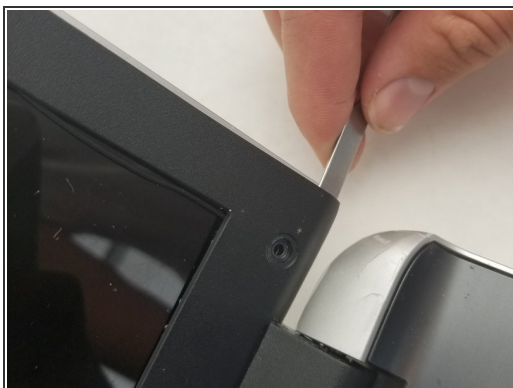

- Using the metal spudger, remove the 2 plastic screw covers at the bottom corners of the screen.

Step 5

- Remove the two 7mm screws with a Philips #00 screwdriver.

Step 6

- Use a plastic opening tool to remove the plastic cover surrounding the screen by running the tool around the edge.
- ⓘ It may be helpful to start with the metal spudger then transition to the plastic opening tool because you will need the metal tip get in initially.

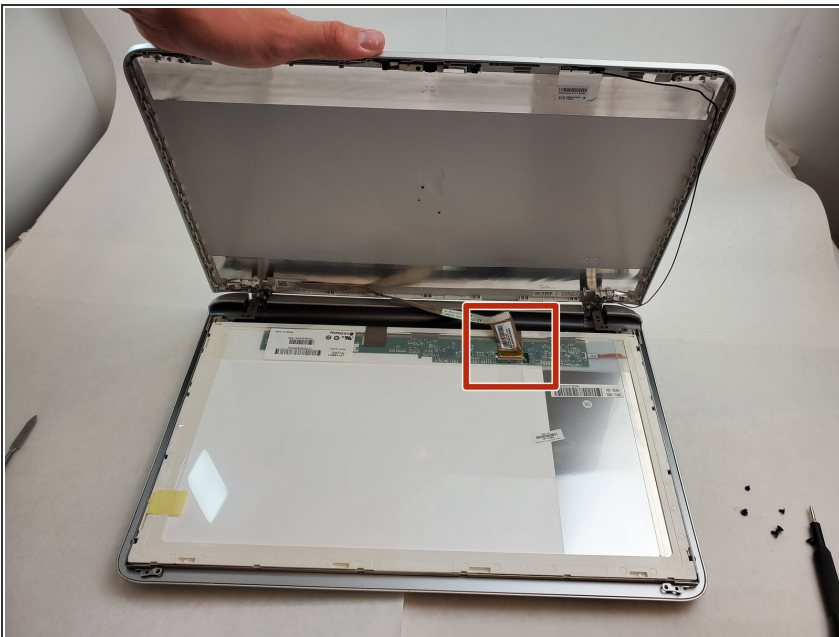

Step 7

- Remove the four 4 mm screws holding the back to the display assembly with a Philips #00 screwdriver.
- Remove the two 3mm screws holding the back cover to the display assembly with a Philips #00 screwdriver.

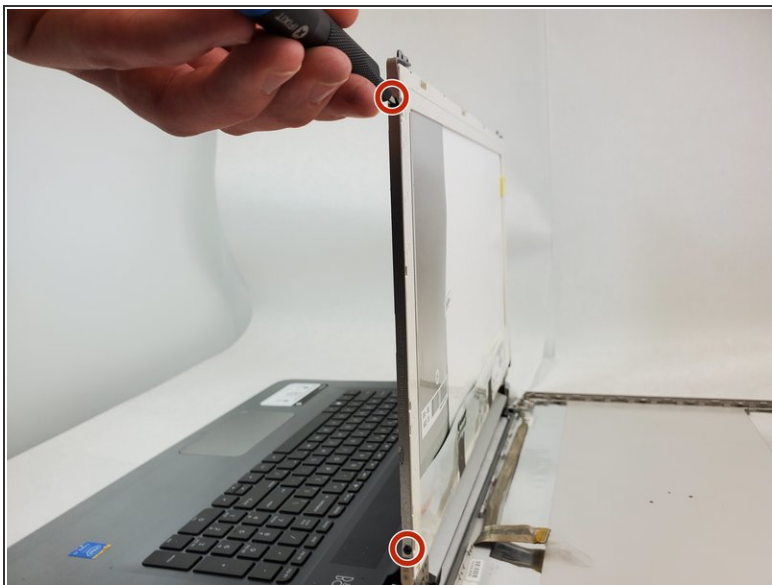

⚠ Lay the cover on the workspace carefully as not to damage the wires still connected to it.

Step 8

- Unplug the wire connected to the display assembly by gently pulling on it.
- ⓘ Tape may be holding it in place.

Step 9

- Remove the four 3mm screws connecting the display assembly to the metal framework with a Philips #00 screwdriver.

 It may be helpful to have someone else support the screen while you remove it.

To reassemble your device, follow these instructions in reverse order.
