- [Phillips #0 Screwdriver \(1\)](#)

## Step 1 — Wifi Adapter

- Start with the bottom of the laptop facing up.
- Locate the small panel under the battery, which houses the wifi adapter, and unscrew the one 5mm Phillips #0 screw holding the panel in place.
- Remove the panel and set it aside.

 Be careful not to snap the 2 tabs on the sides of the panel when pulling it out.

## Step 2

- Unscrew the two 3mm Phillips #0 screw which is located at the corners of the wifi adapter.

## Step 3

- Pull the 2 black wires with the gold pieces out of the wifi adapter.
- The wifi adapter is now free to be removed.

*(i)* When reconnecting the wires for re-installing the wifi adapter, make sure the gold ends are rotated correctly to be properly pushed back in.
