

# HP Pavilion G60-120US Keyboard Replacement

How to replace the keyboard in an HP Pavilion G60-120US laptop.

Written By: Kristen Gismondi

## TOOLS:

- [Phillips #0 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)

## Step 1 — Battery

⚠ Make sure the laptop is turned off.

- Turn the laptop over to reveal the battery.

## Step 2

- Slide and hold the battery release switch to the left to release the battery from the device.

### Step 3

- While holding the battery release switch, grab the battery and pull it upward gently.

### Step 4 — Keyboard

- Using the Phillips #0 screwdriver, remove the seven 4.0mm screws on the battery compartment of the laptop.

## Step 5

- Using the Phillips #0 screwdriver, remove two 4.0mm screws from the hard disk cover.
- Remove the hard disk cover.

## Step 6

- Remove the hard drive by pulling gently and disconnecting the hard drive from the laptop.
- Gently pull on the black and red wiring on the bottom left to separate the wire from the component.

## Step 7

- Remove the two 4.0 mm Phillips #0 screws from the hard disk compartment.

## Step 8

- Using the Phillips #0 screwdriver, remove the two 4.0 mm screws from the memory card cover.
- Remove the memory disk cover.

## Step 9

- Using the Phillips #0 screwdriver, remove the 4.0 mm screw from the Wi-Fi chip cover.
- Remove the Wi-Fi chip cover.

## Step 10

- Using the Phillips #0 screwdriver, remove the two 3.0 mm screws securing the Wi-Fi chip in place.
- Grab the Wi-Fi chip and pull up gently to the left to disconnect it from the laptop.

## Step 11

- Disconnect the two wires connecting the chip's base.
- Remove the Wi-Fi chip.

## Step 12

- Using the Phillips #0 screwdriver, remove the seven 4.0 mm screws on the bottom of the laptop.

## Step 13

- Turn the laptop back to its upright state.
  - Insert an opening tool into the upper right corner of the keyboard and gently lift it to separate it from the laptop.
- ⚠ Be sure not to apply excessive pressure to prevent the bending and breaking of the keyboard.
- ⚠ Do not pull the keyboard all the way out because there is a wiring connection under the keyboard.

## Step 14

- Grab the wiring and gently pull it out to disconnect it from the laptop.
- ⚠ Don't use excessive force.
- Remove the keyboard.

To reassemble your device, follow these instructions in reverse order.
