INTRODUCTION

The screens on laptops can be broken or cracked if dropped. If the screen of your HP Pavilion G60-247CL is damaged or broken, this guide will show you step-by-step how to replace it.

### 🔧 TOOLS:

- Phillips Head Screwdriver: Size PH1 (1)
- Spudger (1)
- Precision Tweezers Set (1)
- Phillips #0 Screwdriver (1)
Step 1 — Battery

- Press down and to the right on the battery lock slide.

- Once slid over to the right the battery will pop up and out.

Step 2 — Screen

- Remove the seven Phillips #1 screws from the back side of the laptop.

Step 3

- Remove the seven Phillips #0 screws from the battery compartment.
Step 4

- Turn the computer around to the front side.

- Using an opening tool, prop open the keyboard casing.
Step 5

- Carefully lift up the keyboard.

- Gently pull up the connecting wire clip to completely detach the keyboard.
Step 6

- At the top right of the laptop there will be another wire clip holding the keyboard casing.

- Carefully pull out the wire clip to fully detach the covering.

Step 9

- At the top left of the computer remove the black clip using the opening tool.

- Push the opening tool to the right to pop out the clip.
Step 10

- Locate at the bottom left of the computer a white clip.

- Using an opening tool, prop out the white clip.

Step 11

- On the left side of the computer locate the black wire with the clear clip.

- Gently pull the wire to the right to detach it.

Step 12

- At the top corners of the computer, unscrew the three Phillips #0 screws.

- Lift up the top half of the computer carefully.

Step 13

- Locate the two screws at the bottom corners of the screen.

- Using the tweezers remove the rubber black covering over the screw.
- Remove the two Phillips #0 screws.

Step 14

- Using the opening tool, prop off the screen covering.

- Remove the covering to expose the screen completely.
