Step 1 — Battery

- Flip the computer over and move the battery lock switch to the "unlocked" position (marked by an orange lock icon).
Step 2

- Press the switch on the right-hand side of the back of the device towards the center until the gray battery icon is no longer visible. This will eject the battery.

Step 3

- Carefully pull the battery away from the device.

Step 4 — Keyboard

- Using the Phillips #0 screwdriver, remove the two screws.

This document was generated on 2019-12-04 08:01:43 PM (MST).

Step 5

- Use a plastic opening tool to pry up one of the upper counters on the keyboard

- Run the tool along the upper edge of the keyboard and towards the opposite corner to release the latches.

Step 6
- Push the button to release the connector and pull it out and remove the keyboard

To reassemble your device, follow these instructions in reverse order.
