INTRODUCTION

The removal and installation of the battery in this computer is very straightforward, requiring no additional tools other than your hands. This guide will demonstrate how to properly remove and replace the battery.

www.iFixit.com

Step 1 — Battery Removal

- Flip the laptop over and locate the release switches located at the back corners of the laptop.

Step 2

- Carefully slide the leftmost switch to the right, which is the unlock position, as shown by the orange unlock icon.

Step 3

- Slide the rightmost switch to the left, which will release the battery from the back of the laptop, enabling it to be pulled out.

- Carefully pull the battery out away from the laptop, disconnecting it completely.

Now that you've successfully replaced the battery, restart your laptop and resume normal operation.
