

# HP Pavilion Touchsmart 10-e010nr Battery Replacement

How to replace an HP Pavilion Touchsmart 10-e010nr battery.

Written By: Sean

## INTRODUCTION

If you need to do any internal work on this device, start with this battery replacement guide. For this guide, you will not need any additional tools. This step is extremely easy to complete and there is little risk involved if performed according to instructions.

## Step 1 — Battery

- Power off device and place with battery facing up.

 Ensure that your hands are not wet, even if the laptop is off or dead.

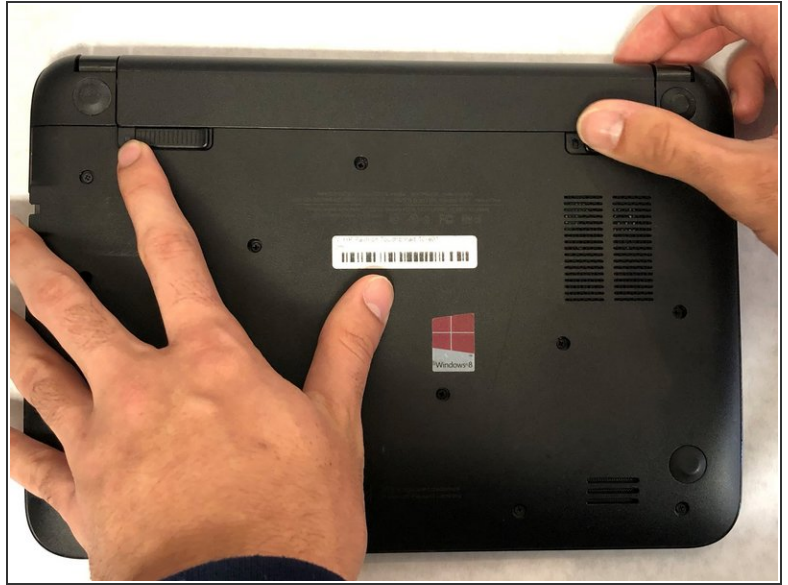

## Step 2

- Push slider on left-hand side of device into unlocked position. This slider is not spring loaded so it should stay in position afterwards.

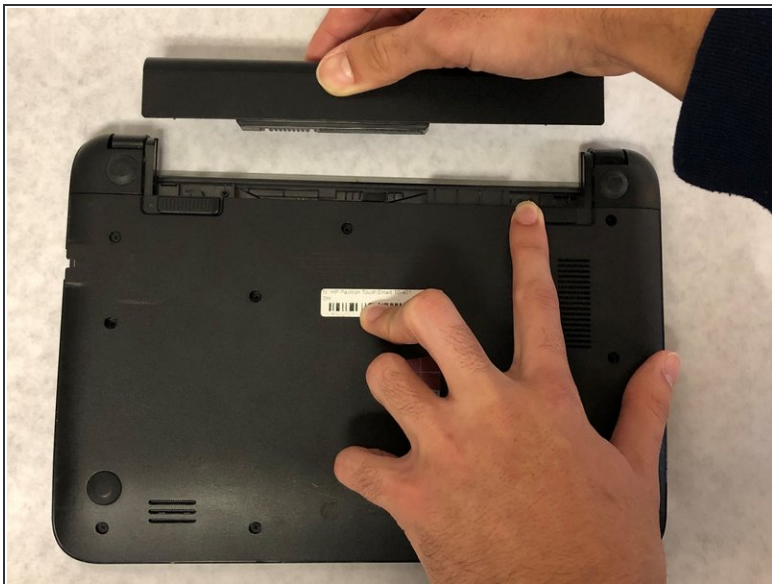

### Step 3

- Push in right-hand slider with your thumb and simultaneously apply slight pressure away from your body.

**i** It may be helpful to keep your left thumb on the left slider and push with both thumbs.

### Step 4

- Battery should easily separate from main device.

To reassemble your device, follow these instructions in reverse order.
