

HP Pavilion Wave 600-a014 Front IO Board Replacement

This guide will instruct you on how to replace the front IO panel.

Written By: Cristian Vanegas

INTRODUCTION

This guide will walk you through on how to replace the front IO Board for the HP Pavilion Wave 600. A Pry Tool and Philips screw driver will be needed to replace this part. Ensure that the device is disconnected from its power source and all other devices are disconnected.

TOOLS:

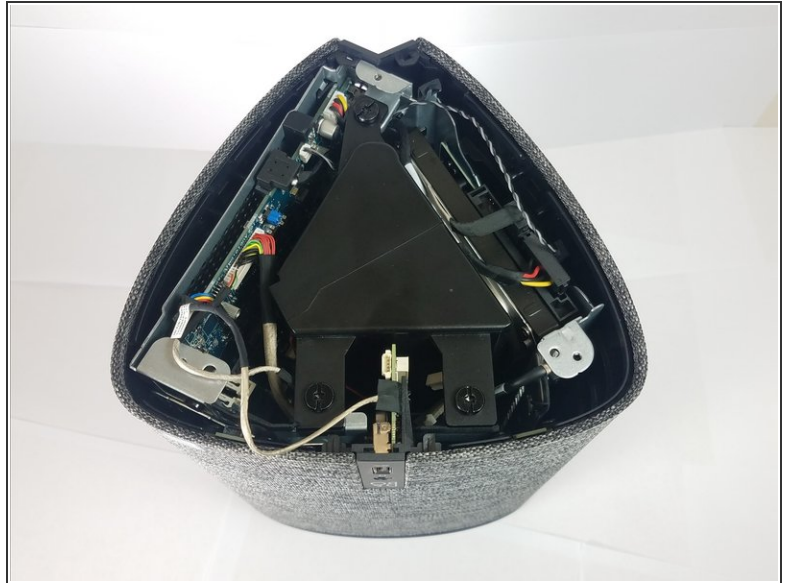

- [Phillips #0 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)

PARTS:

- [Front IO Board](#) (1)

Step 1 — Front IO Board

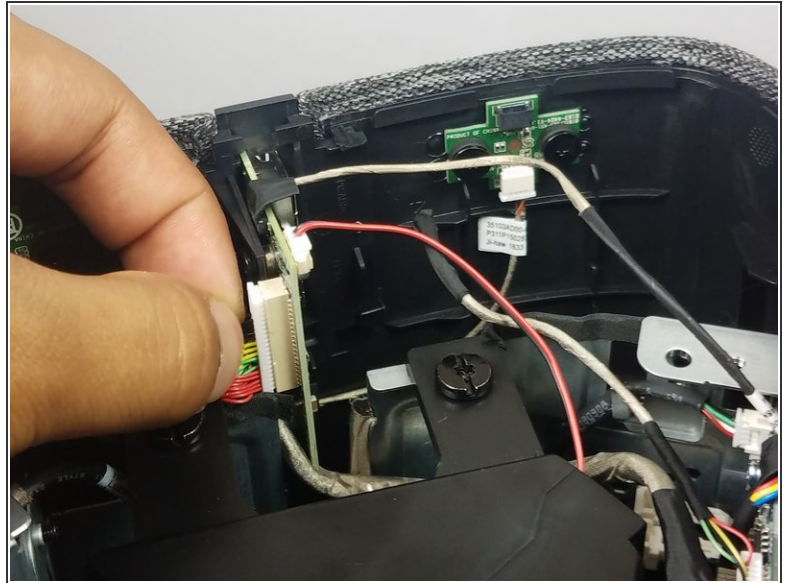

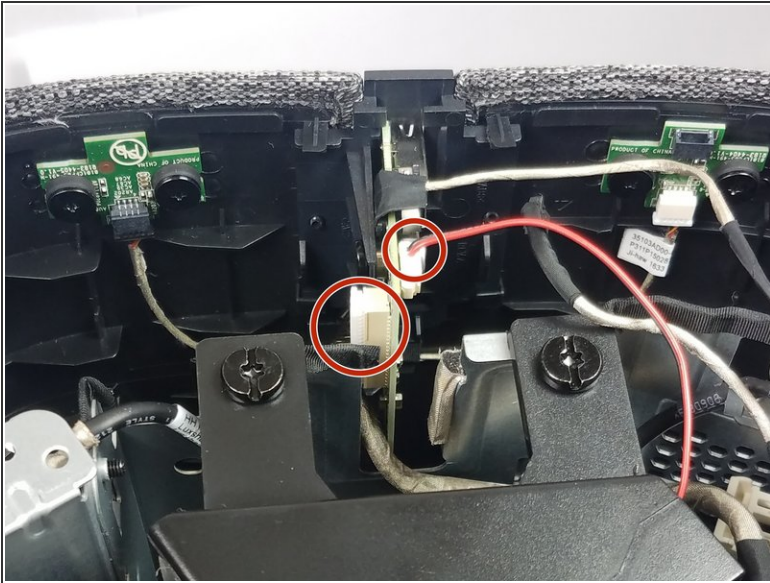

- Turn over computer and remove the rubber feet.
- Remove the 8mm Philips screws indicated by red circles with a Philips #0 screwdriver.
- Use a pry tool and lift up on the lid.

Step 2

- From back IO panel pry open the casing as indicated.

Step 3

- Finally Remove the two cables circled in red for the front IO panel.

To reassemble your device, follow these instructions in reverse order.
