🔧 TOOLS:

- iFixit Opening Tools (1)
- JIS Driver Set (1)

Step 1 — Keyboard
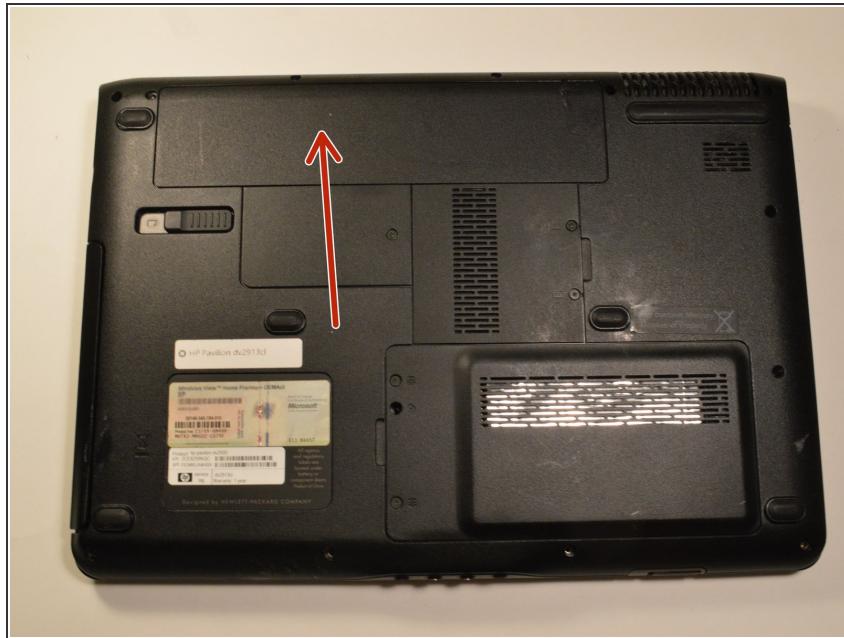

- Locate battery on the bottom of the laptop.

Step 2
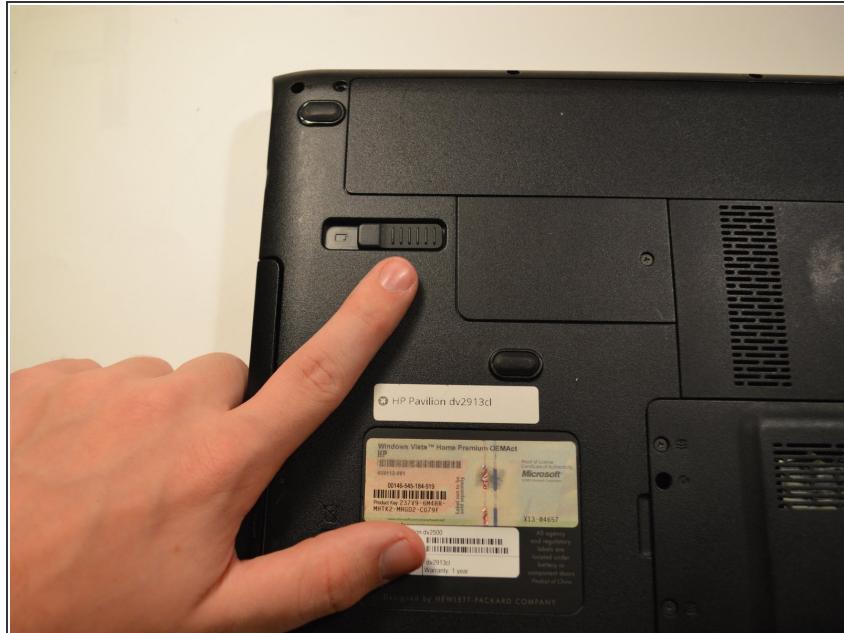

- Slide the battery release bar to the left, this should release the battery so you can then remove it.

Step 3
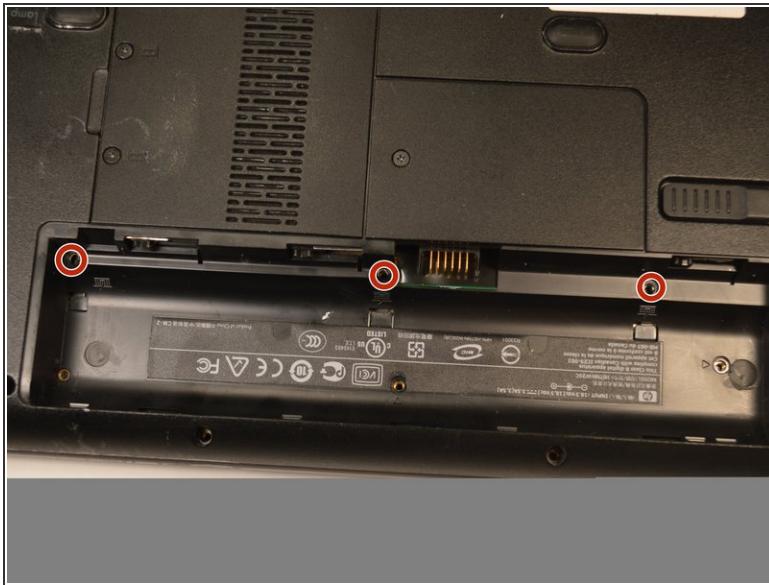

- Locate the three screws for the keyboard by finding the small keyboard picture, remove these screws and flip the laptop back over.

Step 4

- Open the laptop so the keyboard is facing upwards and towards you.

Step 5
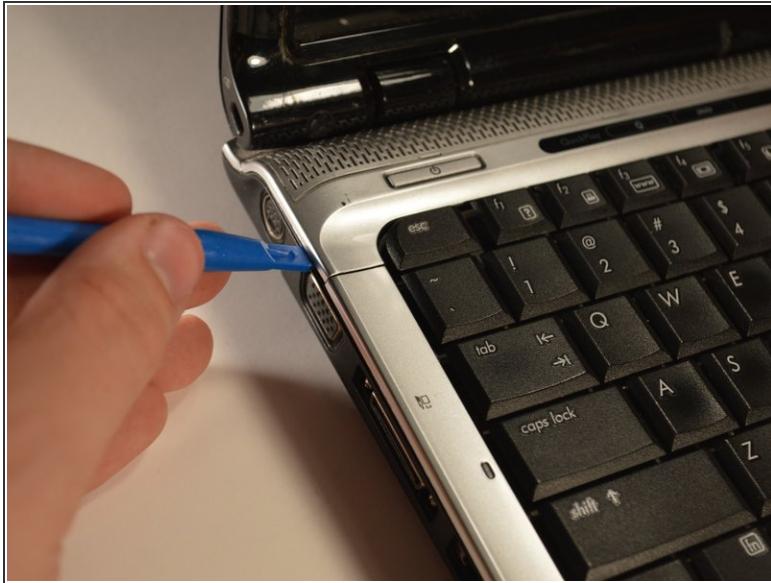

- Use the plastic opening tool to get underneath the plastic bar above the keyboard, pry upwards. Pry the keyboard upwards gently.

⚠ Be careful not to pull the keyboard too hard so you do not rip the silver ribbon cable attached to the laptop.

Step 6
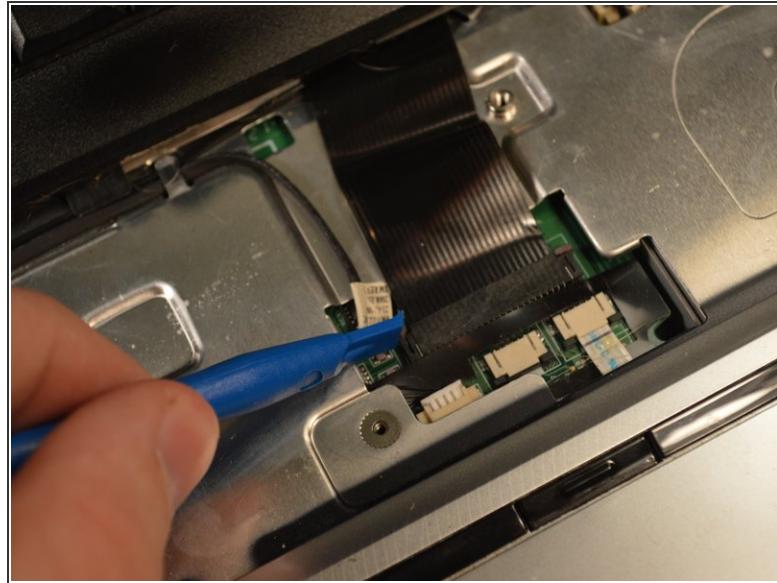

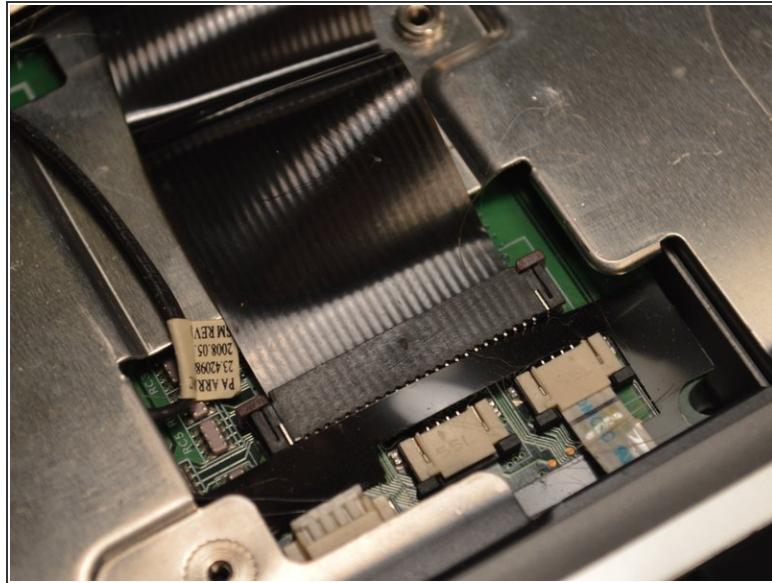

- Release the ribbon cable by using a flathead screw driver. Release the two tabs holding the cable and pull outwards.

- Pull the keyboard up and out from the laptop.

To reassemble your device, follow these instructions in reverse order.
