# HP Pavilion dv6000 Camera Replacement

Repair guide for the camera on the HP Pavilion dv6000 laptop.

Written By: Ben Hirsch
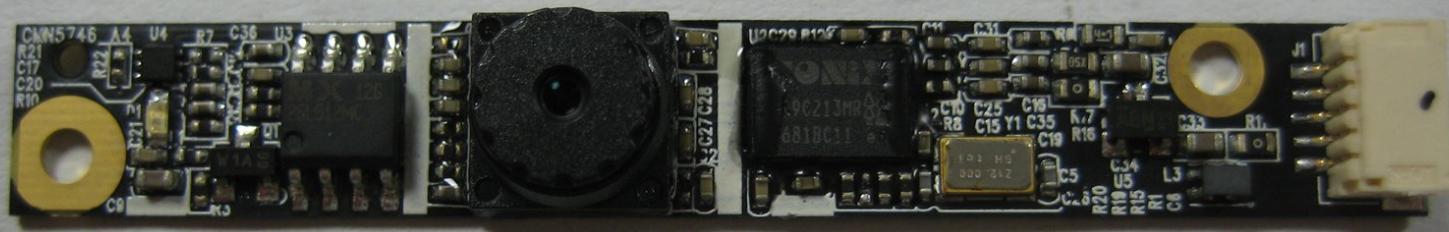

INTRODUCTION

If the camera on your HP Pavilion dv6000 needs to be repaired, follow this guide.

🔧 TOOLS:

- Phillips #00 Screwdriver (1)

Step 1 — Camera
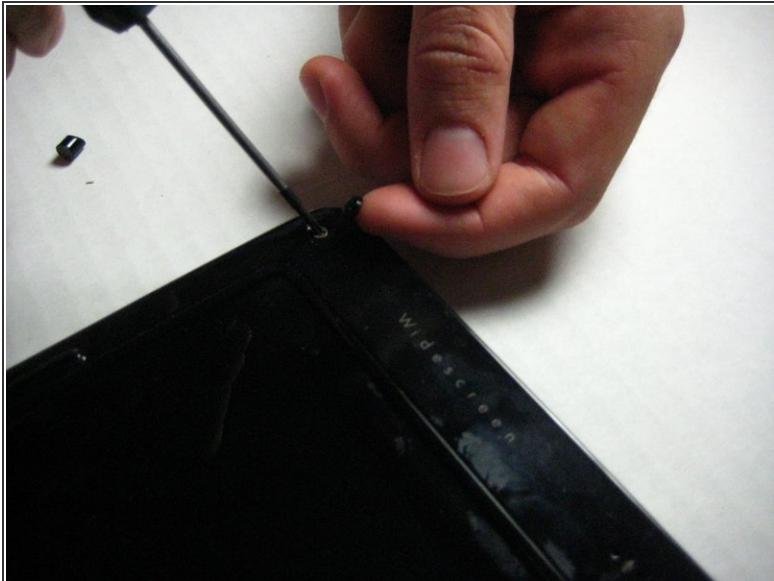

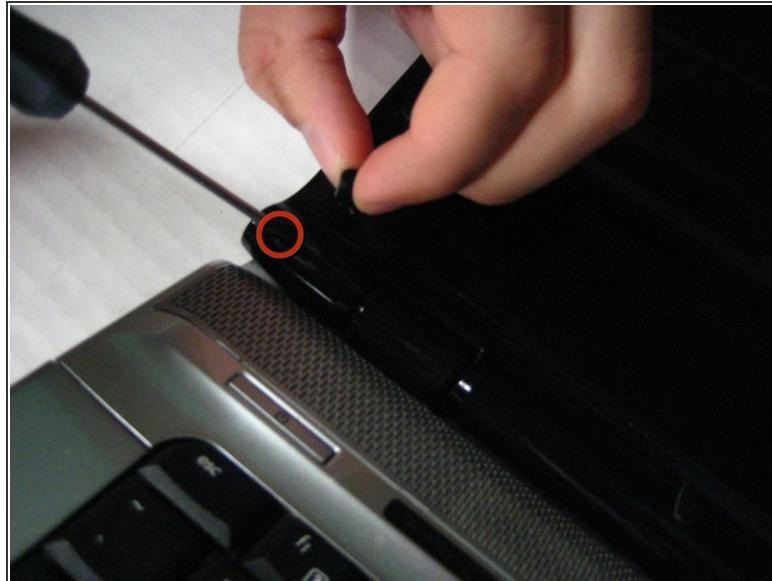

- Remove rubber screw covers from the LCD screen. They cover the screws. The stops on the top of the screen pop off, but the lower covers require a screwdriver to remove.

- If you need to use the screwdriver to remove the rubber screw covers, gently push the screwdriver down the edge of the stopper and then use the screwdriver as a lever to pry the cover from the hole.

- Remove the six 7.15mm screws underneath the stoppers. There are four on top and two on bottom.

Step 2
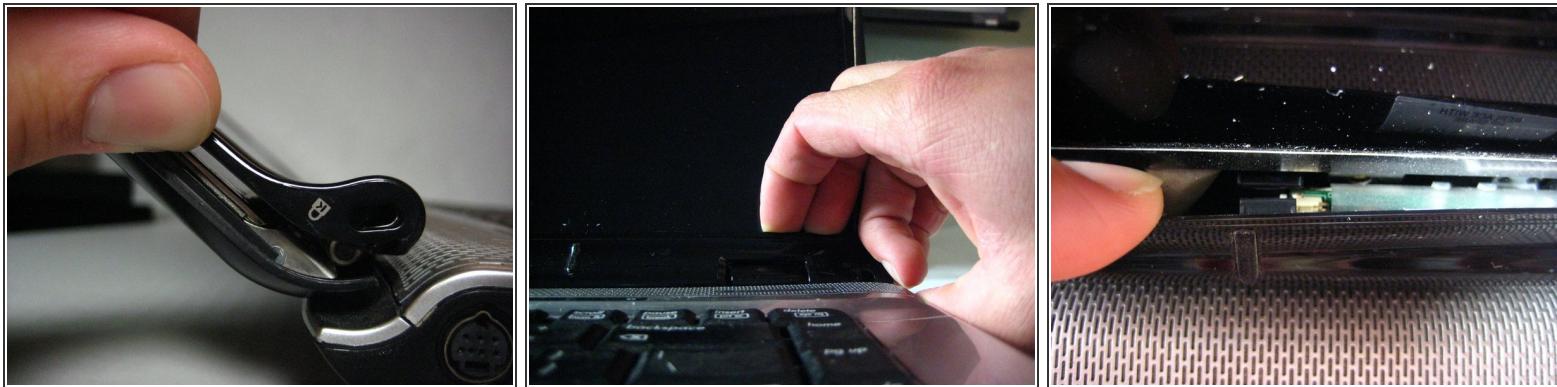

- Press the tabs in on the sides of the screen and pop the plastic covering off.

⚠ The edges of the LCD screen are very sharp. Take care to not cut your fingers!

Step 3
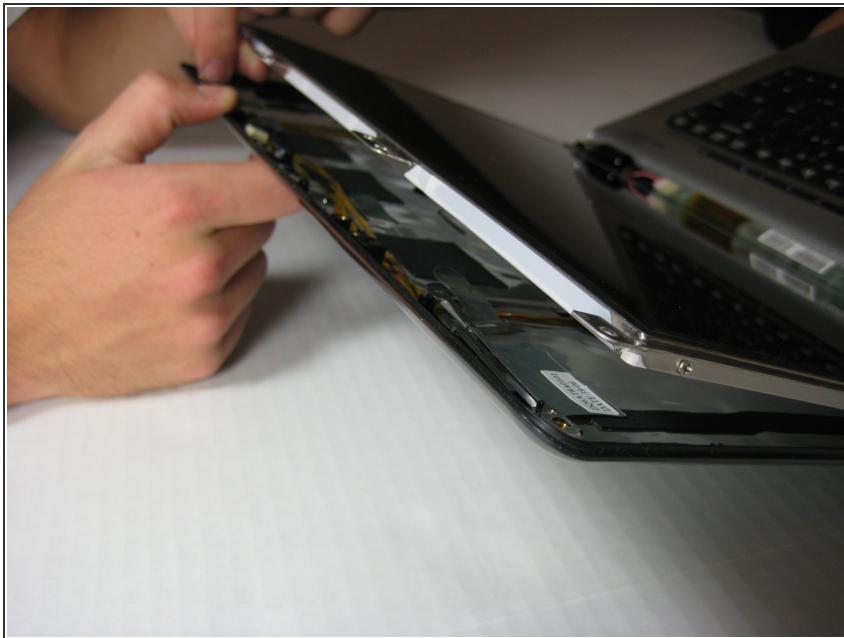

- Lift the screen out of the casing at the top near the camera.

⚠ Take care to not snap the plastic casing! It is brittle and still attached to the bottom of the screen.

This document was generated on 2019-10-01 06:44:50 PM (MST).

Step 4
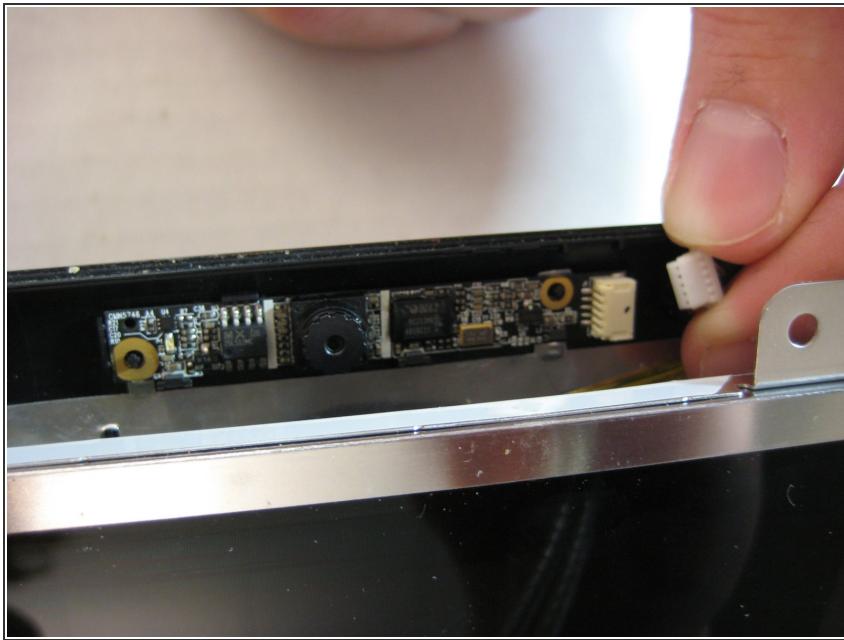

- Gently remove the main cable from the camera.

Step 5
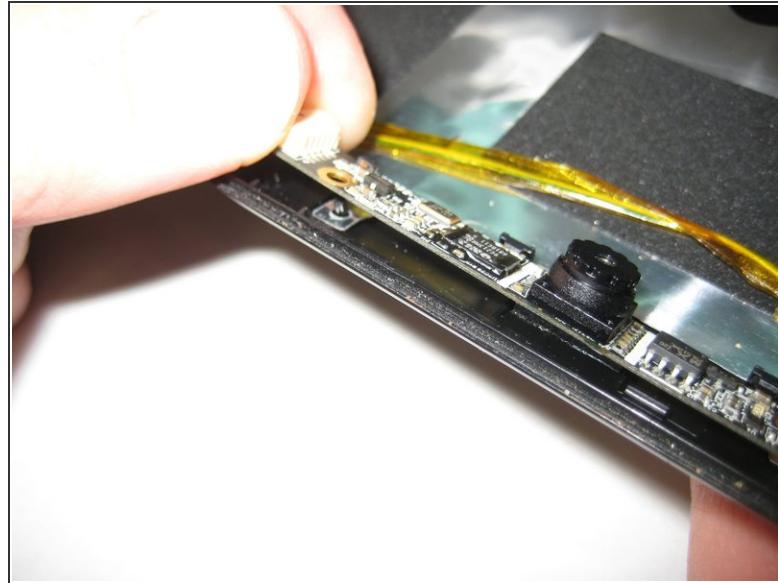

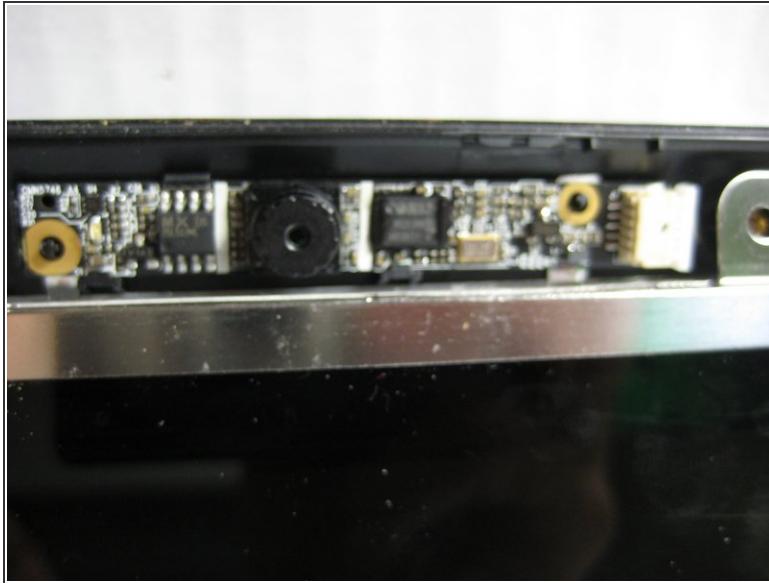

- There are three clasps holding the camera down. Gingerly lift the camera board up, being careful not to snap the board, clasps, or vertical plastic pins (inside the gold-colored rings).

⚠ The metal tabs to the left and right of the camera (for the LCD) are sharp, watch your fingers!

Step 6

- Remove the camera unit from the laptop and you are done!

To reassemble your device, follow these instructions in reverse order.
