## INTRODUCTION

This is a guide to remove the laptop's wireless card.

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Battery

- Flip the computer so the bottom is facing up with the battery away from you.

⚠ Turn off the computer and disconnect the charger.

## Step 2

- Slide the battery switch to the left until the battery unlatches from the base of the laptop.

### Step 3

- Lift the battery from its compartment away from the laptop.

### Step 4 — Bottom Panel

- Loosen the two 5.7 mm screws on the bottom panel using a PH00 screwdriver.
- ⚠ The screws do not come out of the panel due to small washers. Do not try to remove the screws completely.

## Step 5

- Use the metal spudger all around the panel to pop it up from the base.

⚠ When working with electronics, it's important to choose a tool that's ESD-safe to avoid accidental damage to the device. The regular black nylon spudger or a plastic opening tool should be used whenever possible.

ⓘ Using your finger is acceptable but not entirely recommended. Be gentle if you choose to use your hands.

## Step 6

- With your hands, lift the panel completely off the base of the laptop.

## Step 7 — Wireless Card

- Unlatch the two antenna cable connectors from the wireless card.

## Step 8

- Remove the two 2.5 mm screws in the wireless card with a PH00 screwdriver.
- ⓘ You may have to gently bend the cables away from the wireless card to remove the screws

## Step 9

- Gently disconnect the wireless card from the laptop.

To reassemble your device, follow these instructions in reverse order.
