

# HP Pavilion g7-2275dx Hard Drive Replacement

Replacing the hard drive in your HP g7-2275 dx.

Written By: Erik Miller

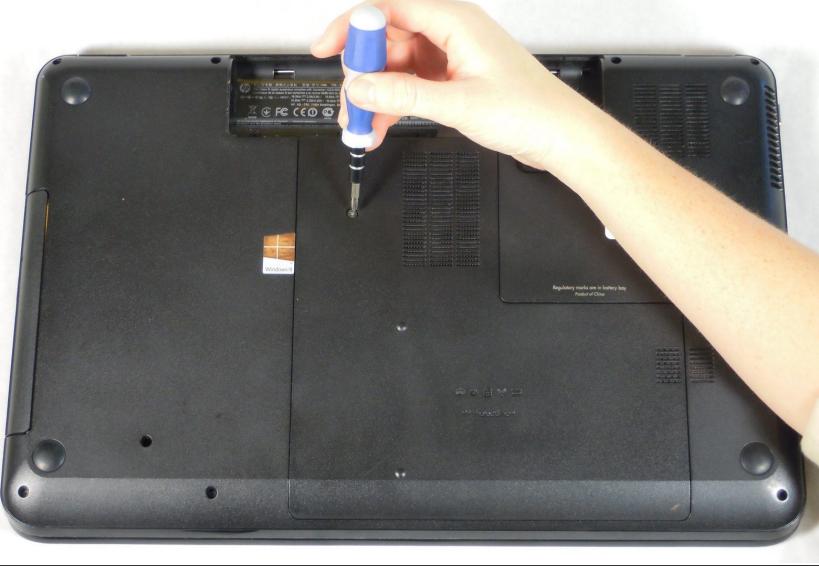

## INTRODUCTION

Did your hard drive crash? Or are you looking for more speed or capacity from a new hard drive? This guide will walk you through replacing your hard drive

### TOOLS:

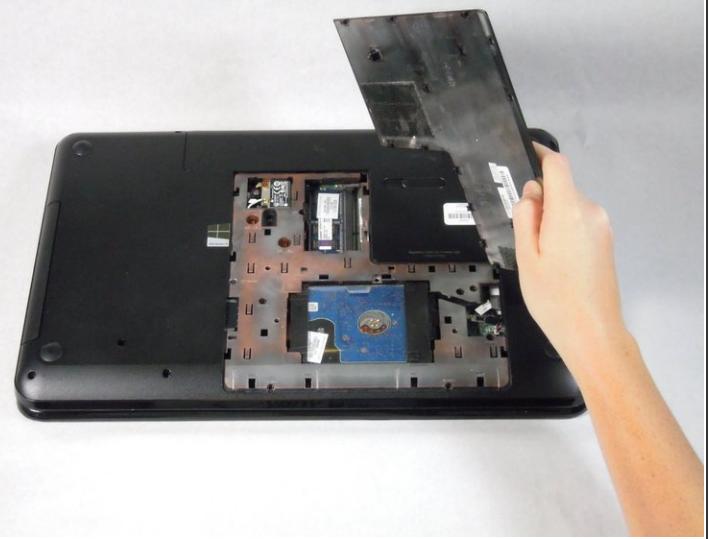

- [Phillips #1 Screwdriver](#) (1)
- [Anti-Static Wrist Strap](#) (1)

## Step 1 — Disassembling HP Pavilion g7-2275dx Back Panel

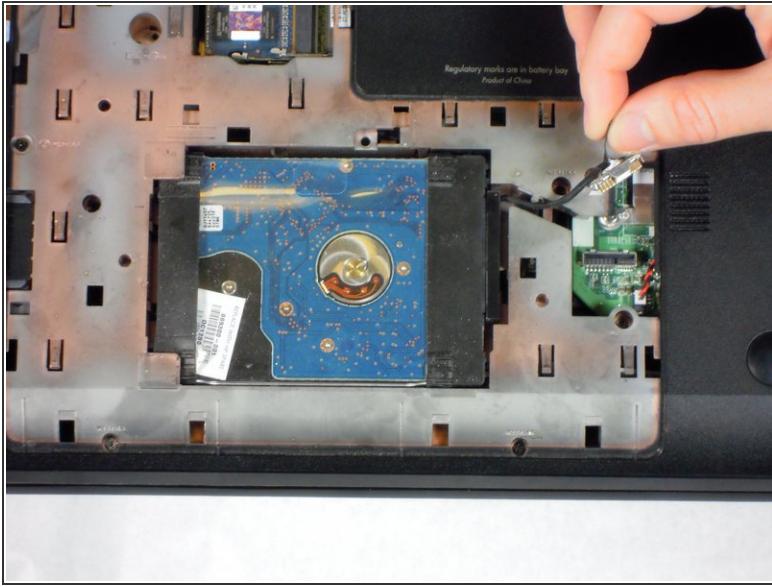

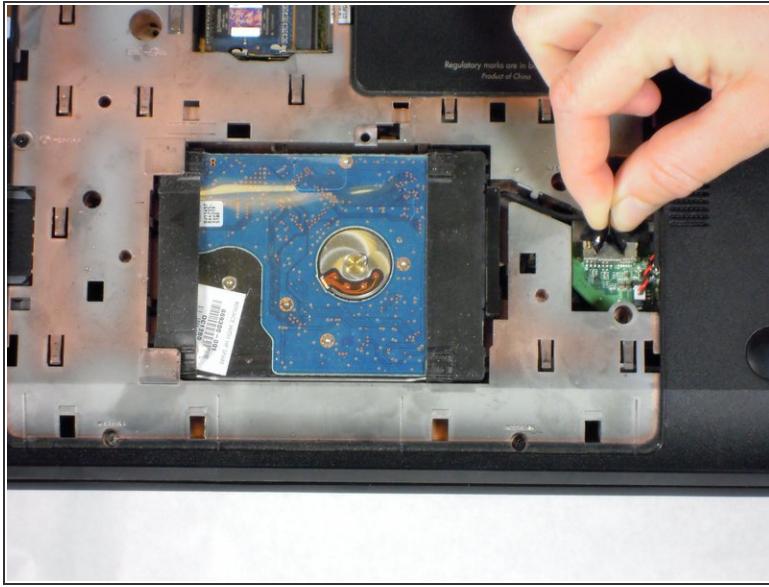

- Unscrew one Phillips #1 screw from the back panel.
- *(i)* The screw is on a spring and attached to the panel. It will pop up, but will not separate from the back panel.

## Step 2

- Slide the back panel down and pull it up.

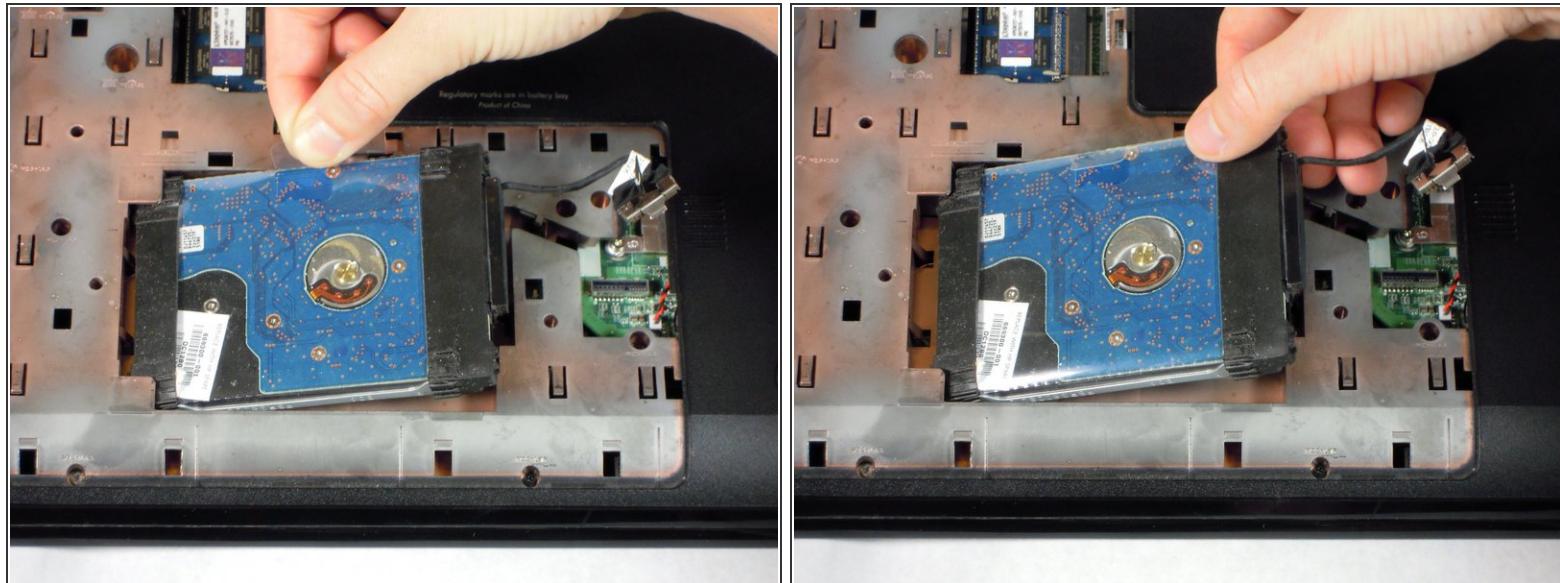

## Step 3 — Hard Drive

! Static electricity can damage the components of your laptop. Make sure you are wearing an anti-static bracelet before you touch the hard drive.

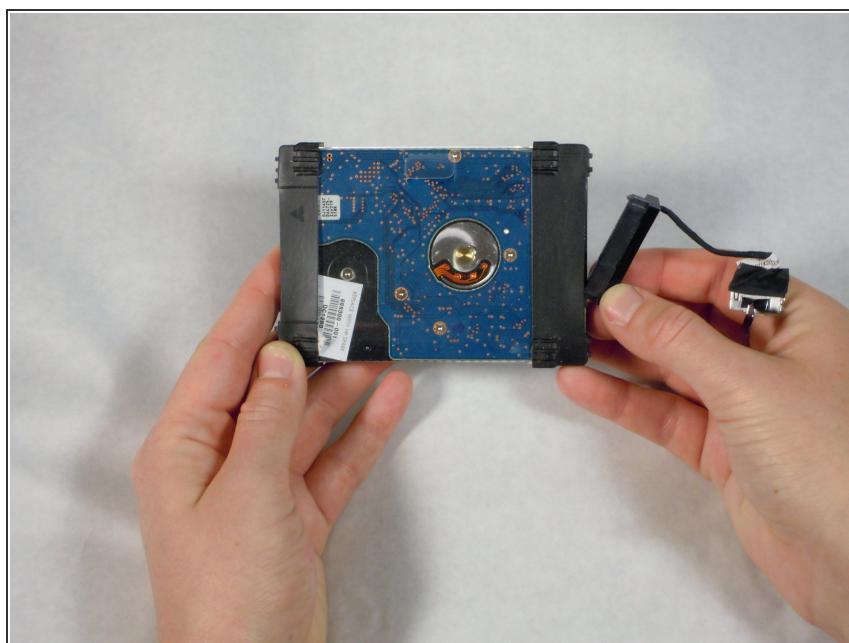

- Using the black tab on the connect and/or a prying tool, lift up to disconnect the black hard drive cable from the green circuit board.
- Pull the black cable up and out of the back panel. This will make taking the hard drive out much easier.

## Step 4

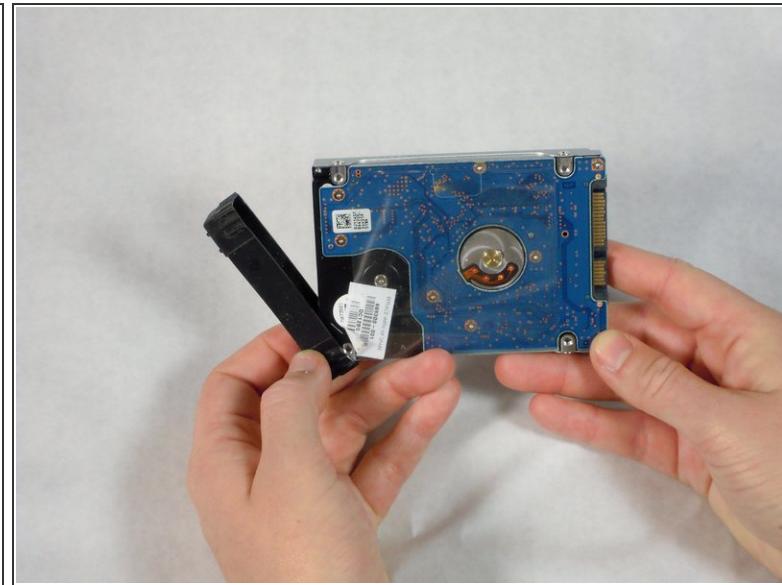

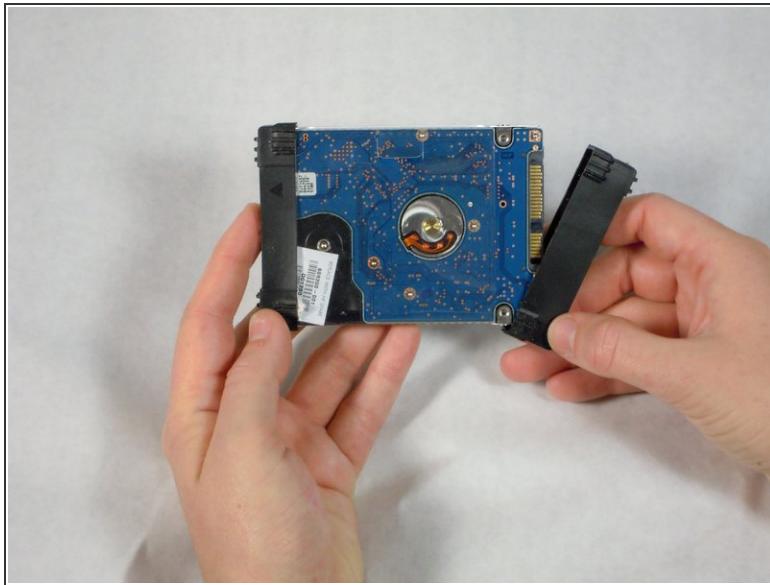

- Gently pull up on the plastic tab attached to the hard drive.
- Pull the hard drive up and to the right to remove it completely from the laptop.

## Step 5 — Hard Drive

- Remove the black SATA cable from the hard drive.

## Step 6

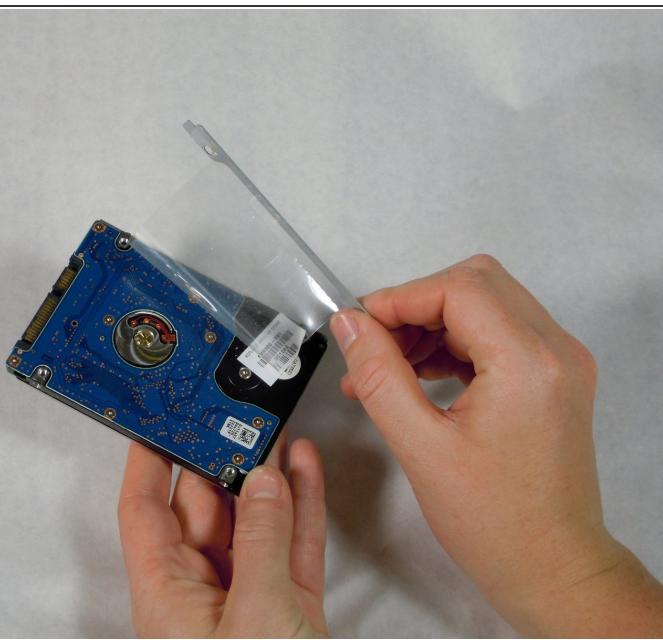

- Remove the black rubber end caps.

## Step 7

- Remove the four silver 5 mm Phillips #1 screws from the hard drive.

## Step 8

- Remove the plastic cover from the hard drive.

To reassemble or replace your hard drive, follow these instructions in reverse order with the working drive.
