

# HP Pavillion dm1-3010nr Cooling Fan Replacement

This guide will assist you in changing the cooling fan in your HP laptop.

Written By: Amitpal Gill

## INTRODUCTION

If your laptop experiences overheating issues while in use, try replacing your fan. When a laptop overheats, it could limit the speed. Replacing the fan may help your device run smoother.

### TOOLS:

- [Phillips #0 Screwdriver](#) (1)
- [Tweezers](#) (1)

## Step 1 — Battery

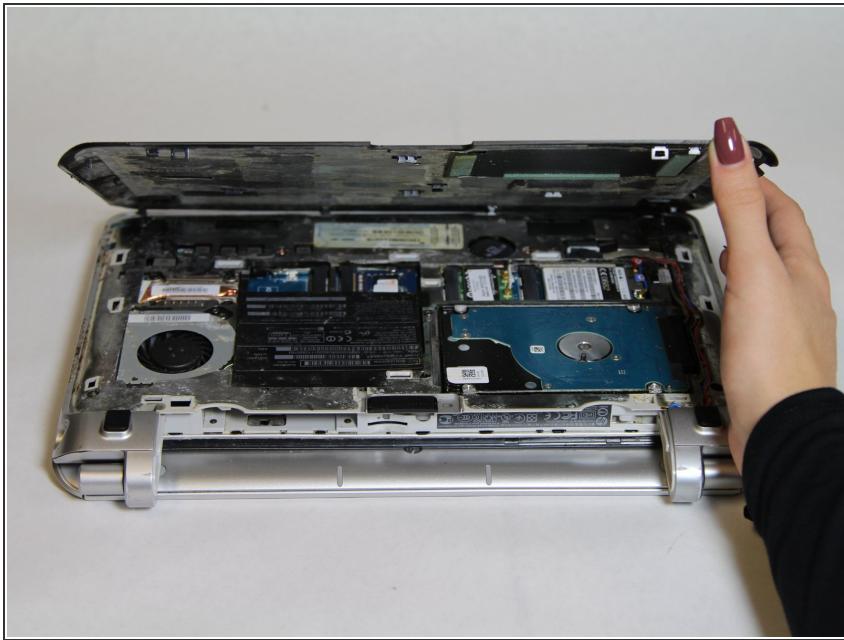

- Flip the device over, so that the bottom cover is exposed.
- Slide the black locking mechanism into its unlock position.

## Step 2

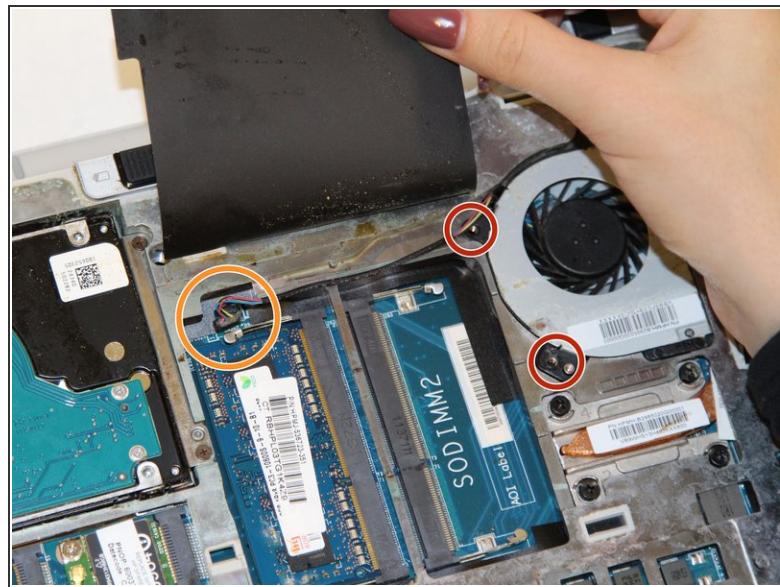

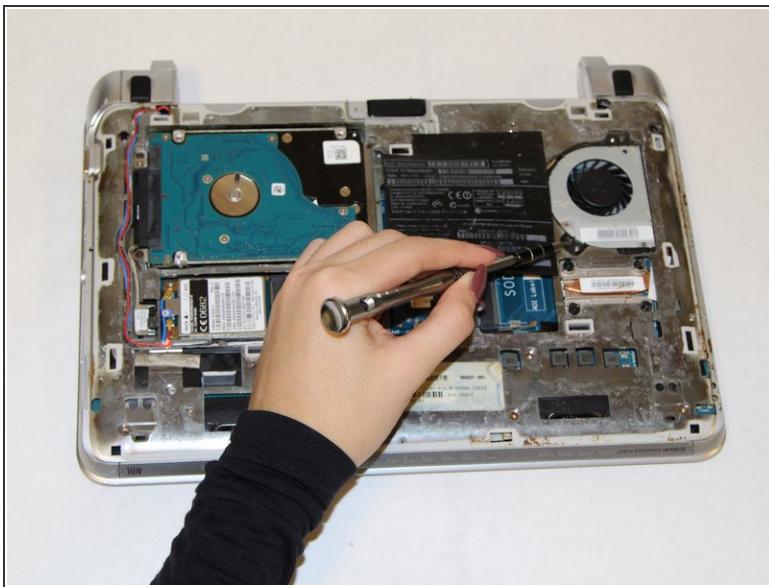

- After unlocking the mechanism, slide the battery out of its compartment.

## Step 3 — Cooling Fan

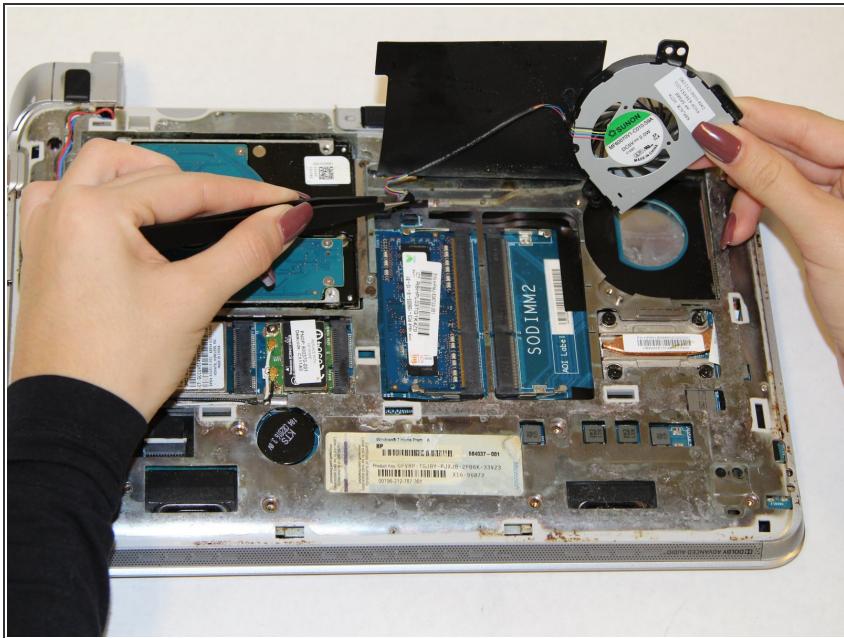

- With the battery removed, the bottom cover can be opened with your hand.

## Step 4

- Use a screwdriver from your iFixit Toolkit to remove the two 5mm Phillips #0 screws shown in each picture.
- Use tweezers to carefully remove the fan's power cable from the motherboard. The cable can be seen in the second picture.

## Step 5

- After removing the screws and unplugging the wire, remove the fan.

To reassemble your device, follow these instructions in reverse order.
