INTRODUCTION

This guide will show you how to replace the screen on a HP Photosmart M547 in order to fix your device.

⚒ TOOLS:

- Phillips #00 Screwdriver (1)

This document was generated on 2019-09-18 11:09:12 PM (MST).

Step 1 — Screen

- Disconnect from all power sources. (Remove batteries, chargers, etc.)
Step 2

- Remove the five 5mm screws from the bottom of the camera with a PH00 screwdriver.
Step 3

● Pop the silver siding off of the camera. Proceed carefully as to not break the plastic.

Step 4

● Make sure that the siding is fully removed and the battery dock is open. Carefully pry the top off of the camera.

Step 5

- Approach from the front of the camera, make sure that the black/red wires as not covering the screw.

- Carefully remove the black 5mm screw from the camera with a PH00 screwdriver.
Step 6

- Flip the camera over and pop off the plastic siding.

Step 7

- Look for the silver 5mm screw connecting the screen to the circuit board. Then carefully remove it using a PH00 screwdriver.

- On the opposite corner of the screen there is a similar screw. Carefully remove that one as well.

- (i) You may need to peel back thin, black plastic to get to the screw. The plastic is purely there for dust protection.

Step 8

ⓘ When you lift the screen off of the rest of the camera, you will see a small piece of ribbon wire connecting the screen and circuit board.

● To remove this connection, you must lift the black bar at the base of the ribbon wire (on the circuit board), then slide the ribbon wire out.

Step 9

● Congratulations! You have removed the screen, you can now replace it and reassemble your camera.

To reassemble your device, follow these instructions in reverse order.
