

HP ProOne 600 G1 Solid State Drive Replacement

This computer has a 256GB solid state drive. Whether it needs replacement due to failure or it is desired to upgrade to a larger size drive, this guide is applicable.

Written By: Janelle Layman

INTRODUCTION

The maximum dimensions of a new solid state drive are 100.5 x 69.85 x 7.0mm. Before performing any work, always remember to completely turn off and disconnect your computer from any power source.

TOOLS:

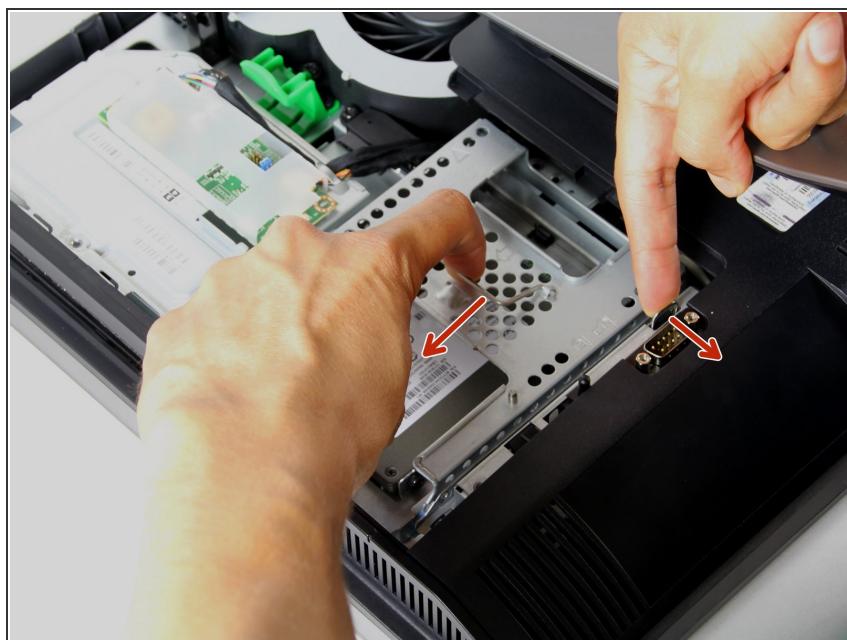

- T15 Torx Screwdriver (1)

Step 1 — Solid State Drive

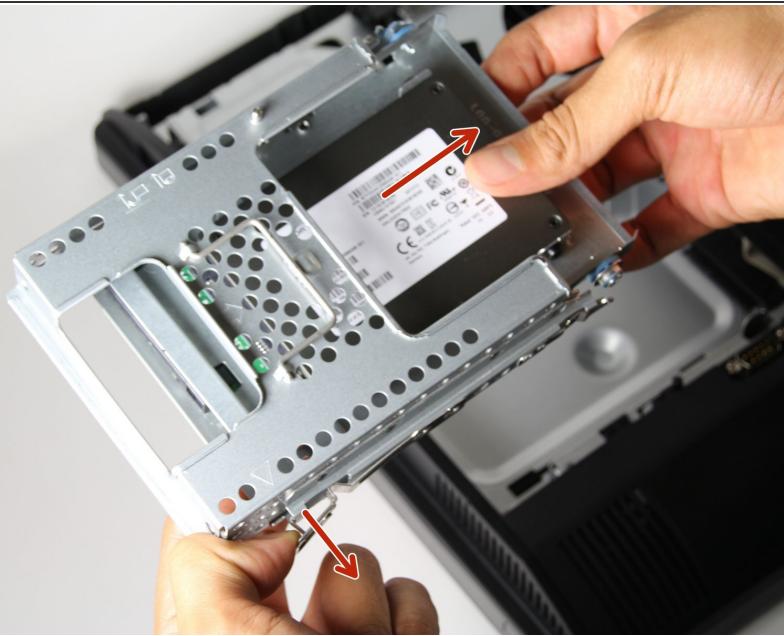

- Push the unlock tabs on the back of the monitor in and towards each other while sliding the back cover up.

Step 2

- Pull up on the hard drive bay handle and push it to the left while holding back the metal tab on the bottom.

Step 3

- Pull side latch out and slide the hard drive tray out of the bay.

Step 4

- Remove the four 5/16" side screws, with the T15 Torx Screwdriver, and gently take out the drive.

To reassemble your device, follow these instructions in reverse order.
