INTRODUCTION

This guide covers the accessing and replacing of the wireless card in an HP Stream 13-c002dx.

TOOLS:

- Phillips #0 Screwdriver (1)
- Flathead Screwdriver (1)
- Metal Spudger (1)

## PARTS:

- HP Stream 13-c002dx Wifi Chip (1)

Step 1 — Keyboard

- Begin by placing your laptop on a clean surface such as a table and away from any liquids which may spill and damage components.

- Flip the laptop over so the bottom is facing up and use your Phillips #0 screwdriver to remove the 11 visible 5mm screws on the back.

  (i) There are some screws underneath the rubber feet. Remove them to gain access

- Unscrew the two remaining 2.5mm screws. Keep these screws separate from the first eleven 5mm screws.
Step 2

- Flip the laptop back over onto its normal side up and raise the screen. Using the metal spudger, separate the keyboard surface from the bottom of the laptop.

- While lifting the keyboard surface from the bottom, you will notice three cables still attaching them together. Gently unplug each of these cables from the motherboard.

- (i) With the screen and keyboard parts of the laptop removed, you have access to the laptop's internal components.

Step 3 — Wireless Card

- Inside the laptop you will notice the wireless card located in the upper middle. This will be what you are replacing.

- Attached to the Wi-Fi card is a black wire that must be removed. Using your hand, lift gently on the wire as close as you can to where it connects to the Wi-Fi card.

- Once the wire is removed, set it aside so it does not get damaged.

Step 4

- Remove the screw holding the wireless card in place.

- With the screw removed, gently pull back the Wi-Fi card and then lift it out of the laptop. You are now ready to insert the new wireless card.

To reassemble your device, follow these instructions in reverse order.
