

HP Stream x360 11-p015wm Battery Replacement

How to replace an HP Stream 11 x360 -p015wm battery.

Written By: DaisyHaskell

 **TOOLS:**

- [iFixit Opening Tools \(1\)](#)
- [JIS #1 \(1\)](#)
- [Tweezers \(1\)](#)

Step 1 — Back Cover

- Orient the laptop to have the back cover facing upwards.
- Remove the four rubber pads located in each corner.

Step 2

(i) Tool required: [JIS #1 Screwdriver](#)

- Using the screwdriver, remove all of the exposed screws.

Step 3

(i) Tool required: [iFixit opening tool](#)

- Open the laptop and orient the keyboard facing upward.
- Slowly wedge the opening tool into the gap between the keyboard and the back cover.
- After loosening the back cover, close the laptop and orient the back cover facing upward. Open the cover.

Step 4

👉 This is a good time to clean any accumulated dust or debris. Use [this link](#) on tips for cleaning.

ⓘ Tool required: [Tweezers](#)

- Carefully use tweezers to remove the audio jack connector from the motherboard.

Step 5 — Battery

- Use the JIS J1 screwdriver to remove the 6.5 mm screws surrounding the battery.

Step 6

- Using the iFixit tweezers, remove the cable connecting the battery to the motherboard.
- Remove the wire located on the top side of the battery.
- All connections should be removed. Simply remove the battery from the computer.

To reassemble your device, follow these instructions in reverse order.
