Step 3 — Removing the Bottom Case

- Remove the keyboard screws

- Remove these screws with a T8 screwdriver

- Remove these screws with a philips screwdriver

- Once they are removed, carefully lift up the bottom case

Step 4 — Removing SSD and LCD Connector Cover

- Unscrew SSD screw and slide the SSD out

- Remove these screws and place the LCD connector cover to the side

- Disconnect all of the motherboard connectors

Step 5 — Removing the LCD

- Unscrew the 6 LCD screws to the top left and right

- Once removed, carefully remove the LCD

- ⓘ **Tip: Remove two screws from each side and then place the laptop on it's side. Unscrew the final two and separate the LCD and Top Case**

Step 6

- Screw the new LCD in and make sure to connect all of the LCD connectors

- Screw the bottom case back onto the laptop

- Connect the battery and put the battery cover back into place

Once the repair had been done. Call the user and let them know their laptop is ready for pick-up
