

HP dv7-4065x Keyboard Replacement

This repair guide will help you in replacing the keyboard on your HP dv7-4065x laptop.

Written By: Mikayla Tabora

INTRODUCTION

By using this guide, you will easily be able to replace the keyboard and resume using your device.

Replacing the keyboard requires you to remove many components. Be sure to keep track of all supplies!

Step 1 — Keyboard

- Remove the battery from the laptop.

Step 2

- Move the switch in the battery compartment.

Step 3

- Carefully flip up the keyboard panel.

 **⚠** Don't pull far on the keyboard. It will still be connected to the laptop via ribbon cables.

Step 4

- Lift the retaining flap on the keyboard cable ZIF connector.
- Carefully pull the ribbon cable from its socket on the motherboard.

To reassemble your device, follow these instructions in reverse order.
