

HTC Desire 826 Battery Replacement

How to replace the battery in your HTC Desire 826.

Written By: Jordan Warnix

INTRODUCTION

If you need to install a new battery in your HTC Desire 826, access it with this guide.

TOOLS:

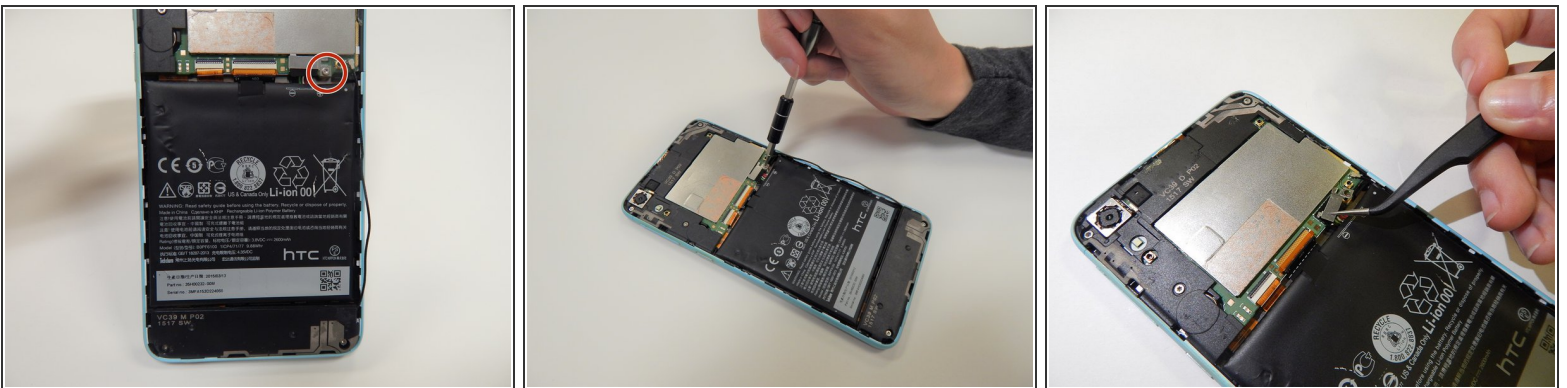

- [T5 Torx Screwdriver](#) (1)
 - [Tweezers](#) (1)
 - [Magnetic Project Mat](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Battery

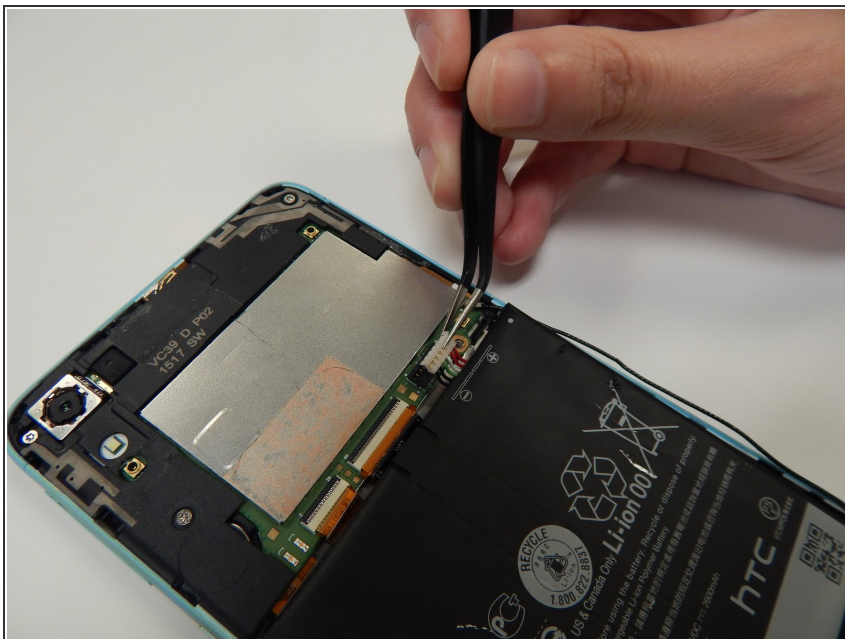

- Find a seam in the back of the device
- Insert the plastic spudger into the seam and pry off the back panel
- ⓘ There will be glue, so keep prying until it comes off or you may need to heat up the edges of the device to loosen the adhesive with the [iOpener](#).

Step 2

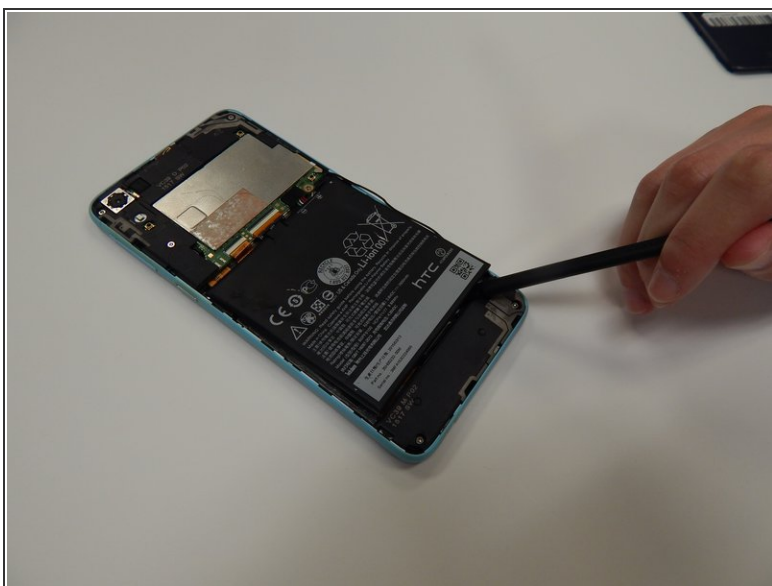

- Remove the 4.0 mm screw above the battery with the T5 screwdriver.
- Remove the metal covering with the tweezers

Step 3

- Disconnect battery cable attached to the motherboard with the tweezers.

Step 4

- Lift battery with plastic spudger and remove

To reassemble your device, follow these instructions in reverse order.
