Step 1 — Battery

- Find a seam in the back of the device

- Insert the plastic spudger into the seam and pry off the back panel

- (i) There will be glue, so keep prying until it comes off or you may need to heat up the edges of the device to loosen the adhesive with the [iOpener](#).
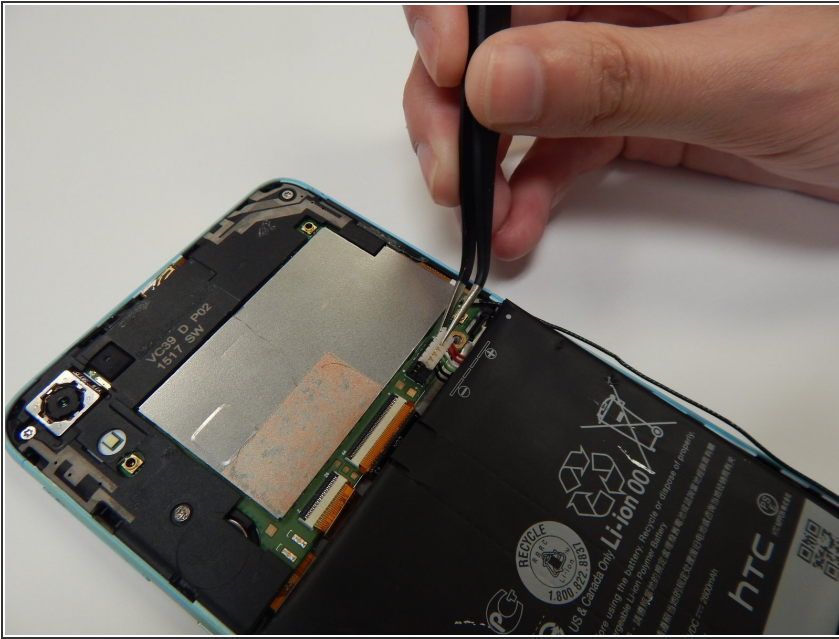

Step 2
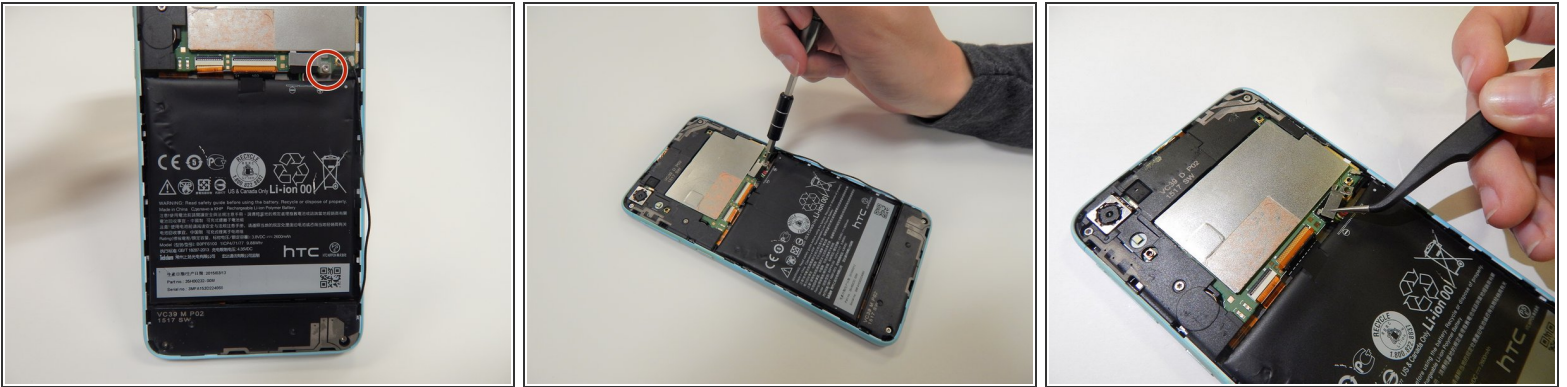

- Remove the 4.0 mm screw above the battery with the T5 screwdriver.

- Remove the metal covering with the tweezers

Step 3

- Disconnect battery cable attached to the motherboard with the tweezers.

Step 4

- Lift battery with plastic spudger and remove

Step 5 — Front Camera

- Use the T5 screwdriver to remove the three 4.0 mm screws as shown.

- Once the screws are removed, pry up the top plastic panel using the black nylon spudger.

Step 6

- Use the tweezers to detach the cameras wire from the top motherboard

- Then use the tweezers to remove the camera

To reassemble your device, follow these instructions in reverse order.
