

HTC Excalibur Battery Replacement

Replacing the battery of an HTC EXCA100 is a simple process, requiring no tools.

Written By: Ian Mitchell

INTRODUCTION

Replacing the battery of an HTC EXCA100 is a simple process, requiring no tools.

PARTS:

- **New battery** (1)

Step 1 — Battery

- Power the phone off. Remove the back cover of the Phone, exposing the battery.
- Grasp the battery by the two indents on either side of it, near the bottom. Lift up, pulling the battery loose. Remove the battery completely.

Step 2

- Take the new battery and orient it correctly -- the arrow should be facing towards the camera lens, face up.
- Insert the battery at an angle, pushing the battery in until it is aligned on the top edge. Push the rest of the battery in, snapping it into place.
- Reattach the battery cover, and power up your phone.

To reassemble your device, follow these instructions in reverse order.
