PARTS:

- HTC Thunderbolt extended battery and cover (1)

Step 1 — Extended Battery

- First pry the battery cover off of the back of the phone

Step 2

- Next remove the existing 1400mAh battery from the phone.

Step 3

- Next install the 2750mAh battery in place of the old 1400mAh battery
- Then place the special extended battery cover over the new battery as the old one will not fit over the new extended battery.

To reassemble your device, follow these instructions in reverse order.
