INTRODUCTION

Warning: Always be sure you are grounded whenever handling any of the circuit or logic boards.

🔧 TOOLS:

- Phillips #00 Screwdriver (1)
- iFixit Opening Tools (1)
- T5 Torx Screwdriver (1)

Step 1 — Front Buttons

● Remove the back panel by sliding it up.

Step 2

● Remove the battery.

Step 3

- Remove the 4 torx-head screws in the corners of the phone using the T5 Torx Screwdriver.
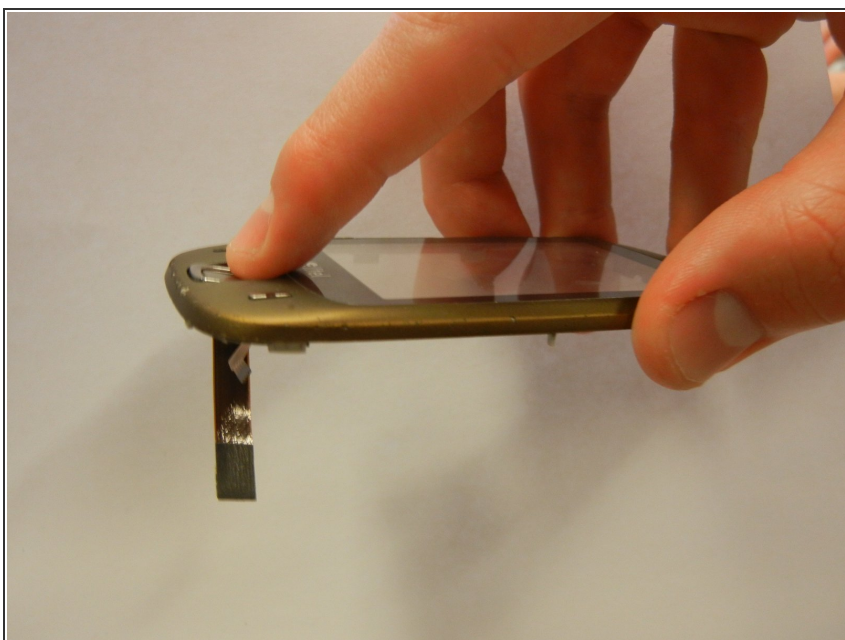

Step 4

- Use the plastic opening tool to remove the front panel from the phone.

- Unplug the front button cable from the inside of the phone.

Step 5

- Remove the 2 philips-head screws on the back of the front panel using the PH00 screwdriver.

Step 6

- Remove the small circuit board by gently pushing on the center button on the front of the phone.

Step 7

- Remove the buttons by pushing on them from the front side of the phone.

To reassemble your device, follow these instructions in reverse order.
