INTRODUCTION

This guide will explain how to install / remove the camera flash on the HTC Wizard 200.

🔧 TOOLS:

- iFixit Opening Tools (1)
- Spudger (1)
- T5 Torx Screwdriver (1)

This document was generated on 2019-09-28 02:53:21 AM (MST).

Step 1 — Battery

- Remove the back case with your fingernail to expose the battery. (Not shown in picture)

- Pull the black tab to remove the battery.

Step 2 — Back Panel
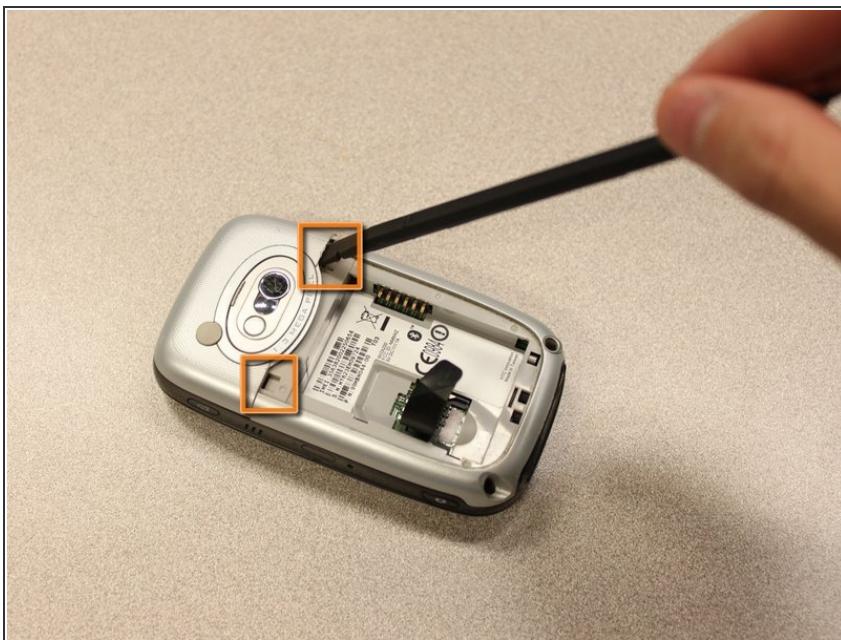

- Use a spudger to begin removal of the camera cover by inserting the flat end into the two notches and gently pry them up one at a time.

This document was generated on 2019-09-28 02:53:21 AM (MST).

Step 3

- Work the spudger around the edge of the camera cover to release the clips.

Step 4
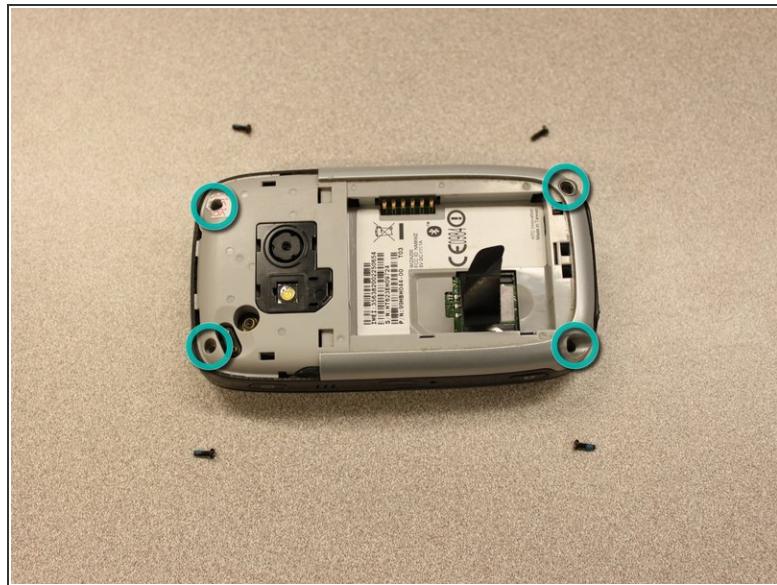

- Use a [T5 Torx screwdriver](#) to remove four 6mm screws that secure the back panel to the main body.

- (i) There is a screw under the "void" sticker.

Step 5

(i) Device rotated 180 degrees.

● Insert the flat end of a spudger into the crack between the front and rear cover.

● Once you have enough of a gap to fit a plastic opening tool into it, use the opening tool to release the clips.

Step 6

- Use the plastic opening tool to continue releasing the clips until you have worked your way around the edge.

Step 7
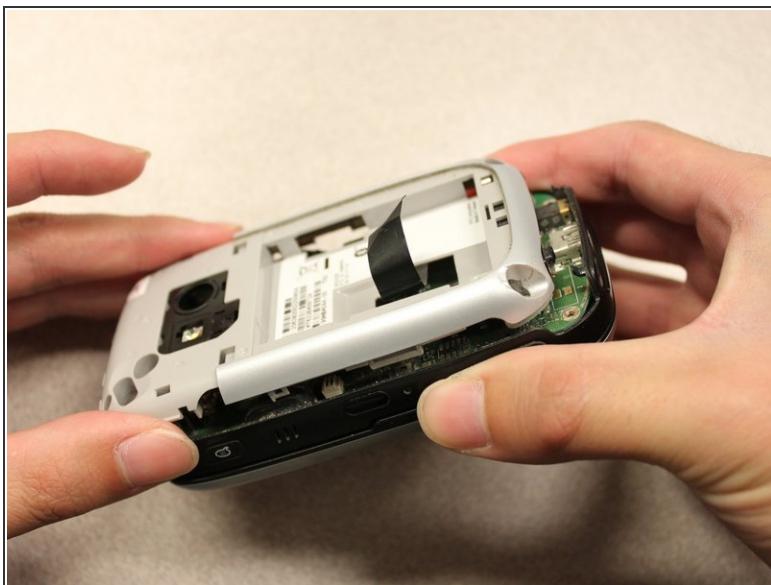

- Pull off the back case panel.

Step 8 — Camera Flash
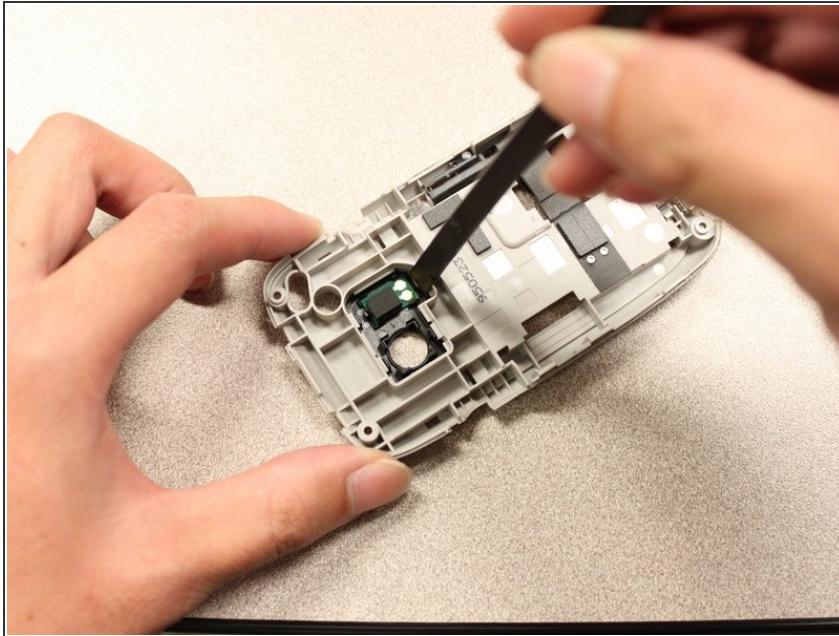

- Use the spudger to pry out the camera flash module.

To reassemble your device, follow these instructions in reverse order.
