

Hamilton Beach 51101BA Blades Replacement

After completing this guide you will have replaced the blades to the blender.

Written By: Brandon Nunez

INTRODUCTION

After using this guide you will learn how to replace the blades in your blender. You will need to use basic tools to complete this guide.

TOOLS:

- **Slip Joint Pliers (1)**
Any type of pliers will do.

Step 1 — Blades

- Remove the lid from the container by holding the base and pulling up on the lid.

Step 2

- Remove the container from the blender.
- Hold the blender and the container, then twist the container in a clockwise motion.

(i) Make sure to follow the lock and unlock markings on the container.

Step 3

⚠ Avoid placing your fingers on the blade, as they could be sharp.

- Using a pair of pliers to hold the blade in place, use your other hand to unscrew the rubber piece on the bottom of the container.
- Remove the rubber piece and the two washers by rotating the rubber piece counter-clockwise.

Step 4

⚠ Carefully, pull the blades out of the container as they are very sharp.

- Using the pliers, remove blades and the washer around the blade shaft.

To reassemble your device with the new blade assembly, follow these instructions in reverse order.
