Step 1 — Power Button

- Remove the container from the base.
  - Hold the blender and the container, then twist the container in a clockwise motion.
    - ⓘ Make sure to follow the lock and unlock markings on the container.

Step 2

- Turn the blender so the bottom is facing you.
- Using a Phillips #2 screwdriver, remove the two 5 mm Phillips screws from the base.

Step 3

- ● Using a Phillips #2 screwdriver, remove the two 5 mm Phillips screws from the motor platform.
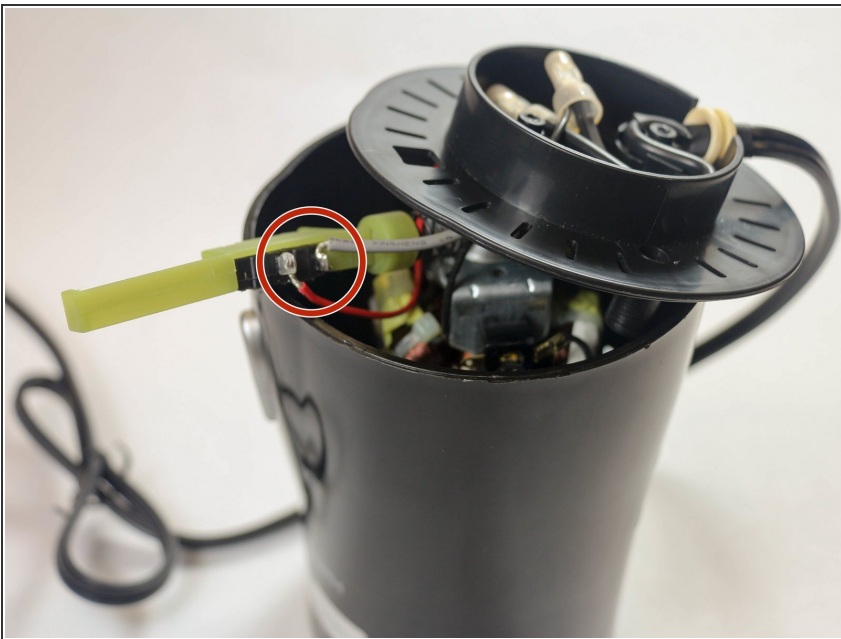

Step 4

- ● Unhinge the motor platform from the blender.
  - ⓘ You may need a plastic spudger to unhinge the plastic bottom piece from the base of the blender.
  - ⓘ You do not need to completely remove this piece from the base.

Step 5

- Pull out the rectangular green piece.
  - ⓘ This is the actual power button.

Step 6

- ⚠ Some experience in soldering is required!

- On the back of the power button, desolder the red and grey wires that are connected to the piece.

To reassemble your device, follow these instructions in reverse order.
