

Hannspree SN12E2 Wifi Card Replacement

This guide will show you how to find and replace the Wifi Card in the Hannspreee SN12E2.

Written By: Kyle Duby

INTRODUCTION

In this guide, you will learn how to find and replace your Wifi card. This solution may be more time consuming and difficult then simply buying a USB wifi adapter and using that instead.

TOOLS:

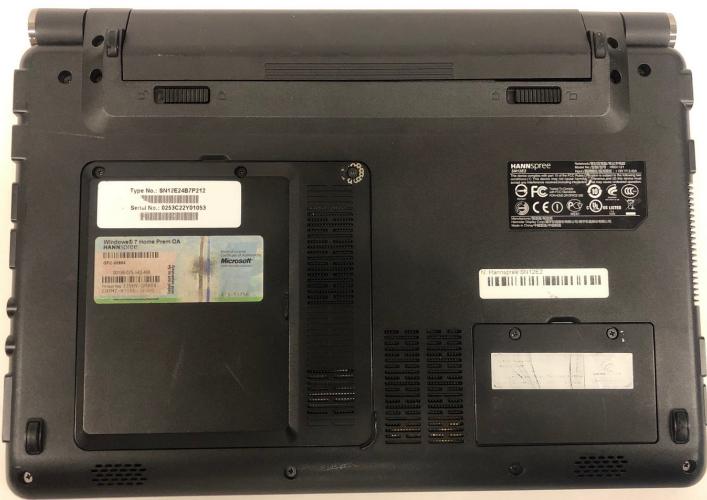

- [Phillips #0 Screwdriver \(1\)](#)

Step 1 — Battery

- Unplug and power off your laptop.

Step 2

- Close your laptop .
- Place your laptop face down on a flat surface.

Step 3

- Unlatch the lock on the top right of your laptop first.
- You will need to pull on the lock on the left side and remove the battery at the same time
- The left lock is a spring lock and needs constant pressure applied in order to stay open.

Step 4 — Hard Drive Access Door

- Remove the three 3mm Phillips #0 screws.

Step 5

- Gently pull on the access panel to remove it.

Step 6 — Wifi Card

- Locate the Wifi Card in the bottom right of the hard drive access panel.
- Remove the two antenna plugged into the the WiFi Card.
- Remove the two 3.6mm PH0 screws.

Step 7

- Remove the WiFi Card by pulling it up and out towards yourself.

To reassemble your device, follow these instructions in reverse order.
