

Hasbro Bop-It Micro Series Back Cover Replacement

This guide will show the teardown of the Hasbro Bop-It Micro Series. This teardown will be necessary before the replacement of any internal parts.

 **TOOLS:**

- Phillips #0 Screwdriver (1)

Step 1 — Back Cover

- Using a #0 phillips screwdriver, remove the (2) #4 Phillips head 8mm screws holding the back cover on. Note that the screws are captured in the back cover, so they do not need to be completely removed.

Step 2

- Remove the (6) #3 Phillips head 6 mm screws shown in any order, also using the #0 phillips screwdriver. When removing the final screw, hold the assembly together. There is a spring inside the device which will pop the assembly apart when all the screws are removed.

Step 3

- Carefully separate the two sections, leaving them connected by the wires. At this point, your device should look like this. This completes the teardown.
