

# Hoover Power Scrub FH50150 Hose Replacement

This guide will show you how to replace the hose on the Hoover Power Scrub FH50150

Written By: Leo

## Step 1 — Hose

- Remove the hose solution connector from its port by pulling up away from the base gently.

## Step 2

- Twist the hose tube connector counterclockwise from the “lock” to “unlocked” symbol.

### Step 3

- Remove the hose tube from the hose port by pulling up away from the base gently.

To reassemble your device, follow these instructions in reverse order.
