## Brush Replacement

Use this guide to replace the brush in the head of the vacuum.

Written By: Erik Ingels

## INTRODUCTION

Use this guide to replace the brush in the head of the vacuum.

### TOOLS:

- Phillips #1 Screwdriver (1)

## Step 1 — Brush

- Place the vacuum on its back.
- On the bottom right side, push the red lever to the left.
- Remove the plastic cover.

## Step 2

- Grab the red switch under the brush and push left.
- Then remove the plastic base plate.

## Step 3

- Use a Phillips #1 screwdriver to remove the two screws on the right side of the brush.

## Step 4

- Remove the two screws on the left side of the brush.

## Step 5

- Pull the clear plastic away from the head of the vacuum.
- Slide the belt off the metal rod with your finger.
- Pull the brush free.

To reassemble your device, follow these instructions in reverse order.
