

# Hoover T-Series WindTunnel Pet UH70102 HEPA Filter Replacement

A guide to replacing your HEPA filter in your vacuum.

Written By: Sophia Stockburger

---

## INTRODUCTION

This filter is located at the top of the vacuum. The filter should not be replaced unless visibly worn, or older than 6 months. If neither case is true, simply empty the dust into the trash and put the filter back in place. DO NOT clean with water. This step should begin with the vacuum unplugged.

-

## Step 1 — HEPA Filter

- Remove the filter by pressing on both indents and pulling away from the vacuum.
- ⓘ Clean the filter by gently tapping it on the edge of a garbage can. Replace the filter if it is damaged or is more than 6 months old.

To reassemble your device, follow these instructions in reverse order.
