

Hoover WindTunnel 2 Rewind Leaky Hose Replacement

This guide will explain how to replace a leaky hose for the Hoover Windtunnel 2 Rewind.

Written By: Mickey McGuire

INTRODUCTION

The Hoover Windtunnel 2 Rewind's hose sometimes leaks while the vacuum is working. This means that the device needs a new hose. You can find replacement hoses at your local Hoover retailer.

PARTS:

- [Replacement Hose \(1\)](#)

Step 1 — Leaky Hose

- Detach the top of the hose from the device by pressing the release button and pulling up on the hose.

Step 2

- Remove the other end of the hose by twisting the hose clockwise and pulling it off.

Step 3

- Firmly insert the larger end of the replacement hose into the upward facing hole in the vacuum.

Step 4

- Line up the smaller end of the hose and insert it into the downward facing hole.
- Twist the hose until it locks.

The Hoover Windtunnel 2 Rewind must have a solid and functional hose to work correctly. With this set of instructions, it is easy to replace a leaky hose.
