

Hover-1 Titan Power Button Replacement

How to replace an old or malfunctioning power button in Hover-1 Titan.

Written By: Alexander Pham

INTRODUCTION

If your hoverboard will not turn on, follow this guide to replace the power button.

TOOLS:

- **Phillips #1 Screwdriver** (1)
- **14mm Wrench** (1)

Step 1 — Bottom Right Panel

- Flip the hoverboard so the bottom is facing up.
- ⓘ The right side is the side that has the power button. There is also an "R" on the metal plate underneath the battery.

Step 2

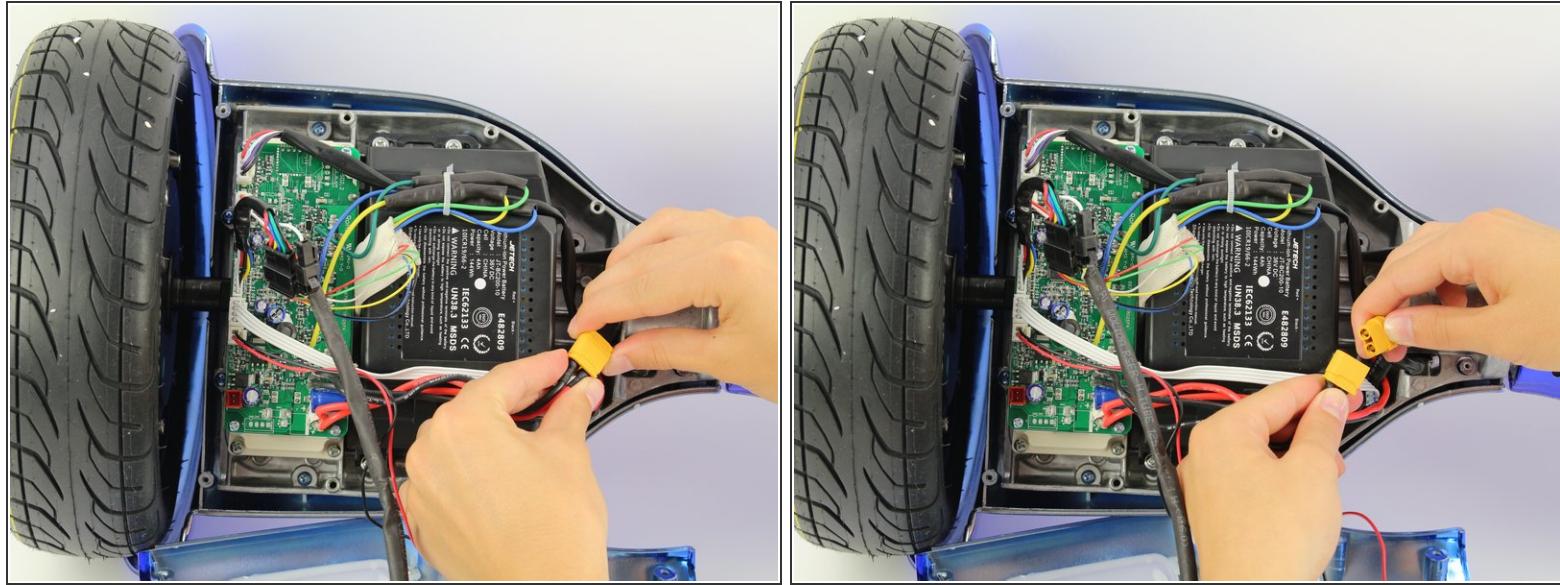

- Using a Phillips #1 screwdriver, remove the two 14 mm screws closest to the center of the hoverboard.
- Using a Phillips #1 screwdriver, remove the four 12 mm screws located in the middle of the panel.
- Using a Phillips #1 screwdriver, remove the two 15 mm screws located closest to the wheel.

Step 3

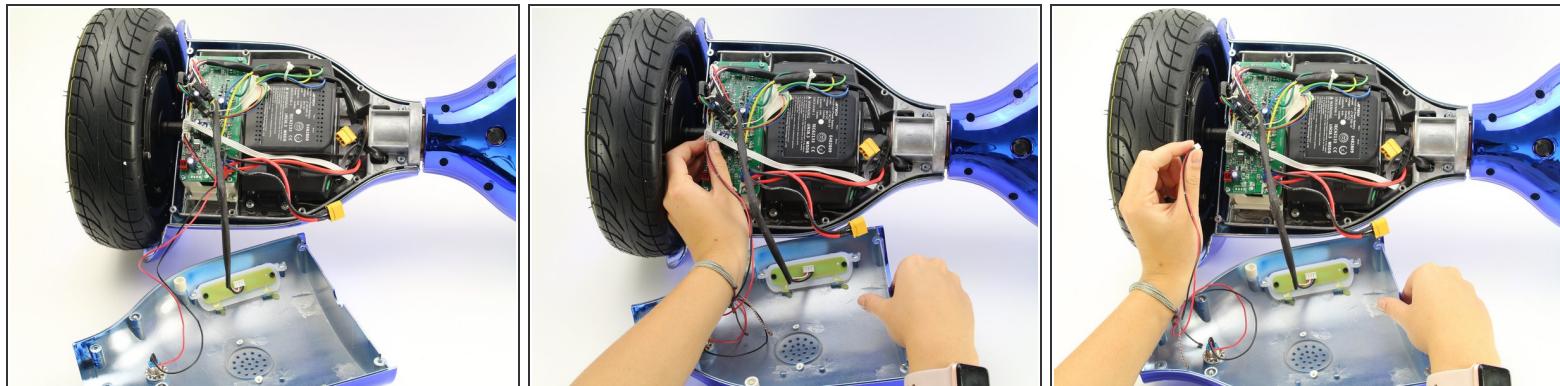

- Grip the bottom right panel and lift to remove it.

Step 4 — Power Button

- Disconnect the battery by holding the yellow connectors and pulling apart.

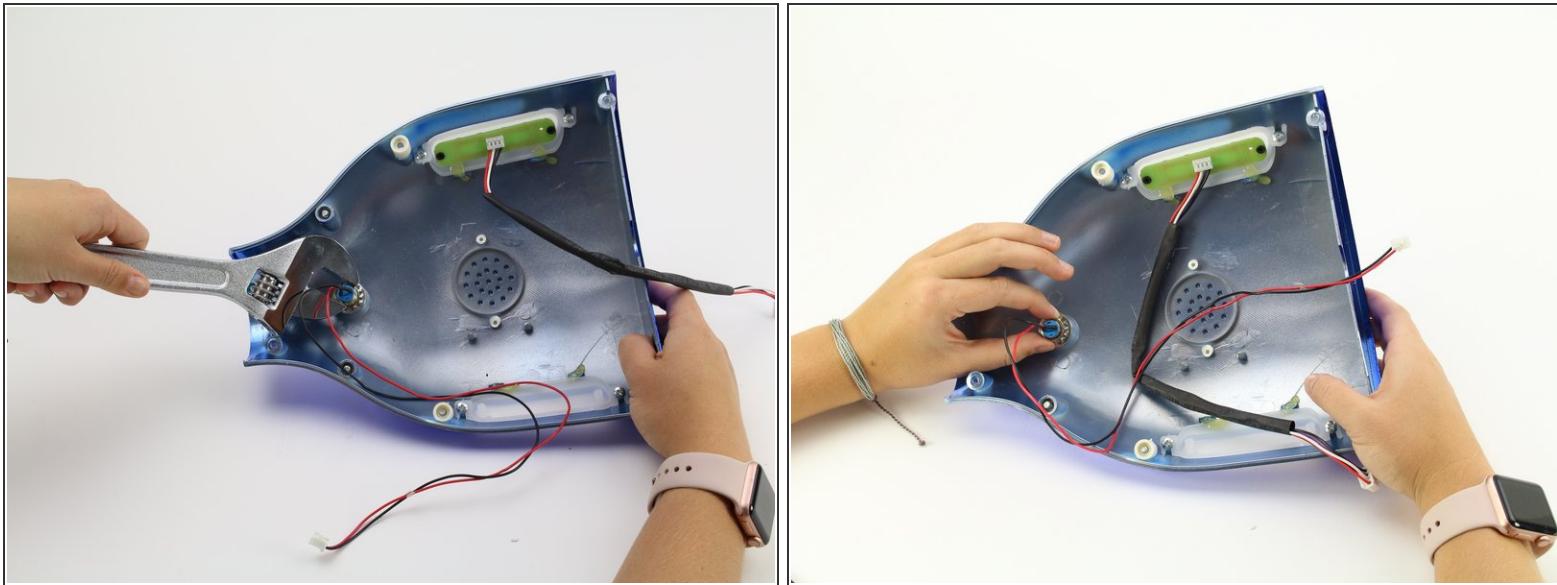

Step 5

- Unplug the red and black power button connector on the motherboard by squeezing the connector and pulling away from the board.

i You can also unplug the light connector to free up your work space.

Step 6

- Use an adjustable wrench to remove the 14 mm nut holding the button in the shell.

Step 7

- Pull the power button out of the panel.
- Replace the power button.

To reassemble your device, follow these instructions in reverse order.
