INTRODUCTION

If the sternum strap comes off of its rail or gets lost, it's easy to replace. The following instructions will show you how you replace a sternum strap with a hydration tube holder.

PARTS:

- VAUDE Chest Belt with Drinking Tube Mount (1)

Step 1 — sternum strap with a hydration tube holder

- The sternum strap has come off on both sides of the backpack suspension system.

Step 2

- Guide the sternum strap onto the rail at the thin end.

(i) Depending on where you want to attach your hydration tube, thread the sternum strap with the attachment onto the right or left rail.

Step 3

- Guide the other side of the sternum strap onto the thin end of the rail and position it.
