TOOLS:

- Flathead 3/32" or 2.5 mm Screwdriver (1)

PARTS:

- VAUDE Thread base plate for QMR hook (1)

Step 1 — Thread plate on bike bag

- Slightly lift the hardback panel using a screwdriver and push the thread place underneath.

Step 2

- Adjust the thread plate in the middle of the groove.

Step 3

- Lift the thread plate with the screwdriver so that the screw from the QMR hook can catch the thread.

Step 4
