Written By: Anna Handza

INTRODUCTION

This guide will allow you to quickly de-stick house windows in an efficient, and long lasting way with WD-40 Specialist Silicone Lubricant.

TOOLS:

- [WD-40 Silicone Lubricant](#) (1)
-

Step 1 — How to Fix Sticking House Windows

- Unlock the windows' sash lock.

Step 2

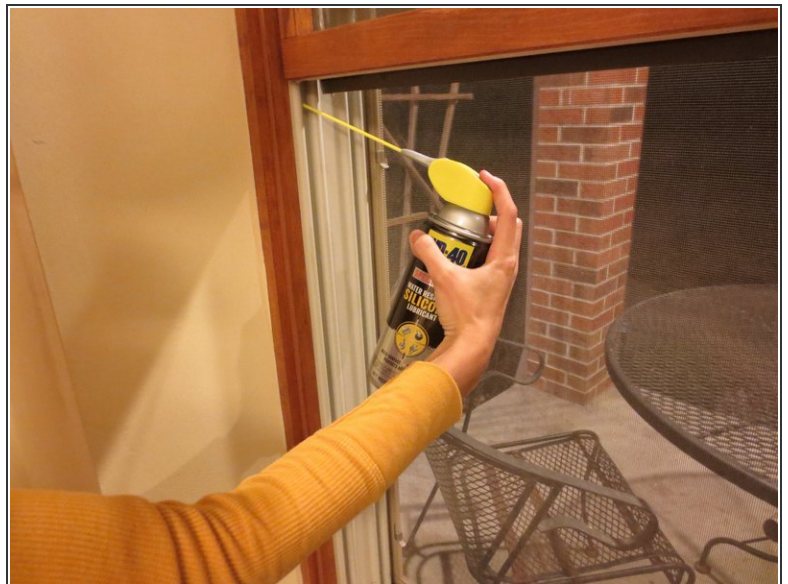

- Slide a single window pane in its' opposite direction.

Step 3

- Apply the silicone spray where the window and channel connect if the window is stuck.

Step 4

- Apply a thin coating of the silicone spray onto the windows' channels.

Step 5

- Slide the window up and down along the channel until the silicone spray is evenly distributed.

Step 6

- Repeat steps 2 - 5 with the opposite window pane.

Step 7

- Apply more silicone spray as needed.
