

How to Hard Reset your HTC myTouch 3G

This guide will explain how to return your phone to factory default settings.

Written By: Erik

INTRODUCTION

This guide will explain the process of restarting the HTC myTouch 3G after an Operating System crash.

Step 1 — How to Hard Reset your HTC myTouch 3G

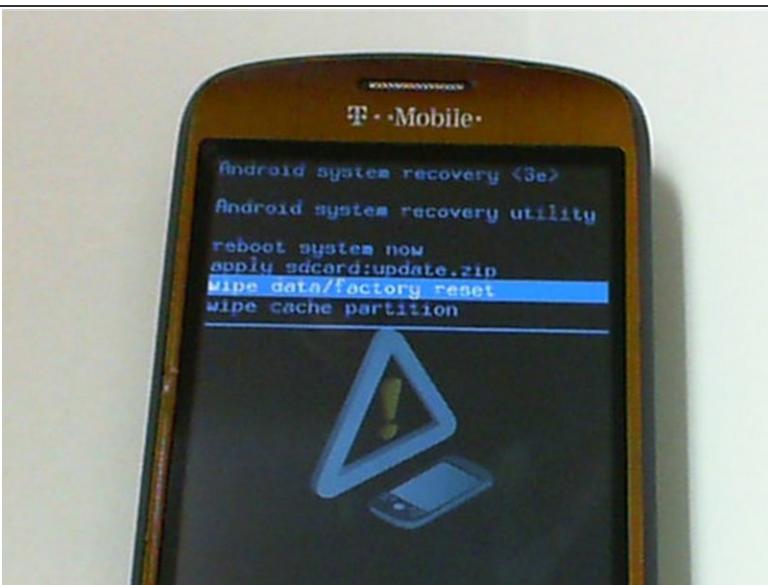

- Start by turning off the phone.
- Hold the **Home** and **End** keys for ten to thirty seconds, or until the home recovery display appears.

Step 2

- Press the **Home** and **End** button once again to open the *Recovery Options* menu.

Step 3

- Using the trackball, scroll to and select "wipe data/factory reset".

Step 4

- Once the reset is complete, scroll back to "reboot system now".

Warning: This process will wipe out any data on the phone.
